

CPT based Sub-Seasonal Forecasting (Philippines)

NOAA's CPC International Desks

CPT is using NCEP CFSv2 (Climate Forecast Systems V.2) forecasts.
Initial condition: Feb 23, 2020

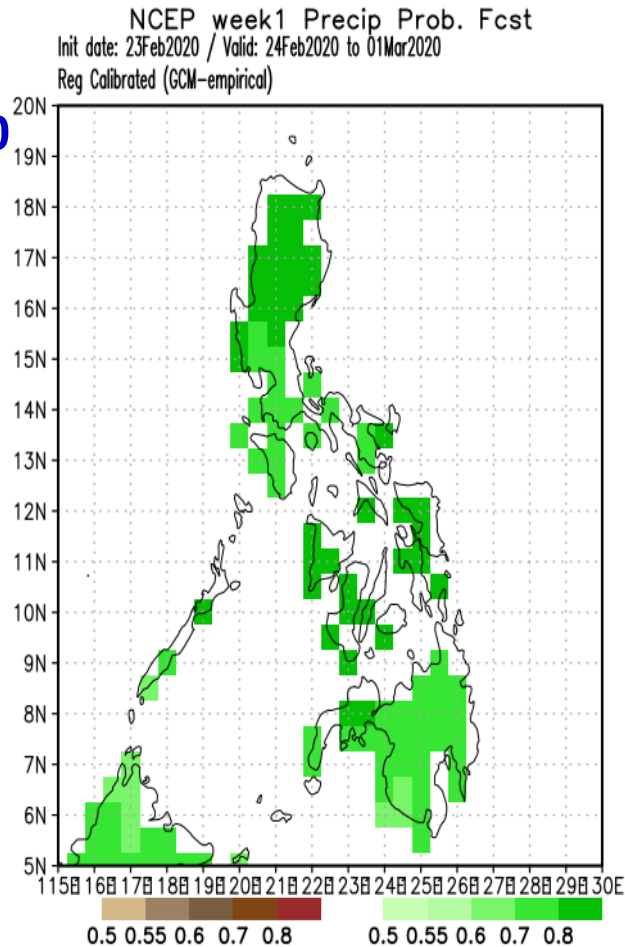

The legend is interpreted as probability of below average rainfall for the brown shaded color and probability of above-average rainfall for green shaded color.

Rundate: Feb. 27, 2020

Idate: Feb 23, 2020

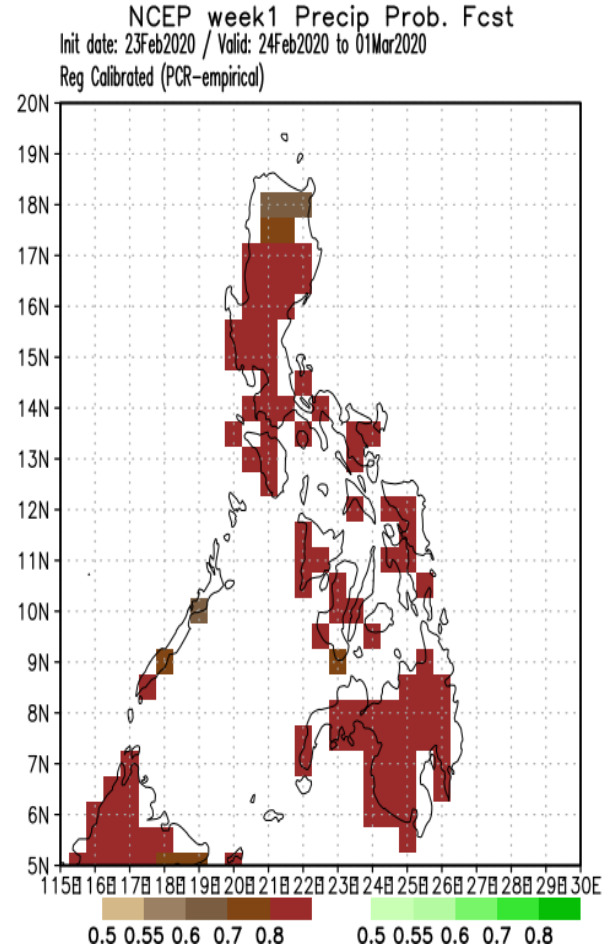

Week 1 Forecast
Feb 24–Mar 1, 2020

GCM

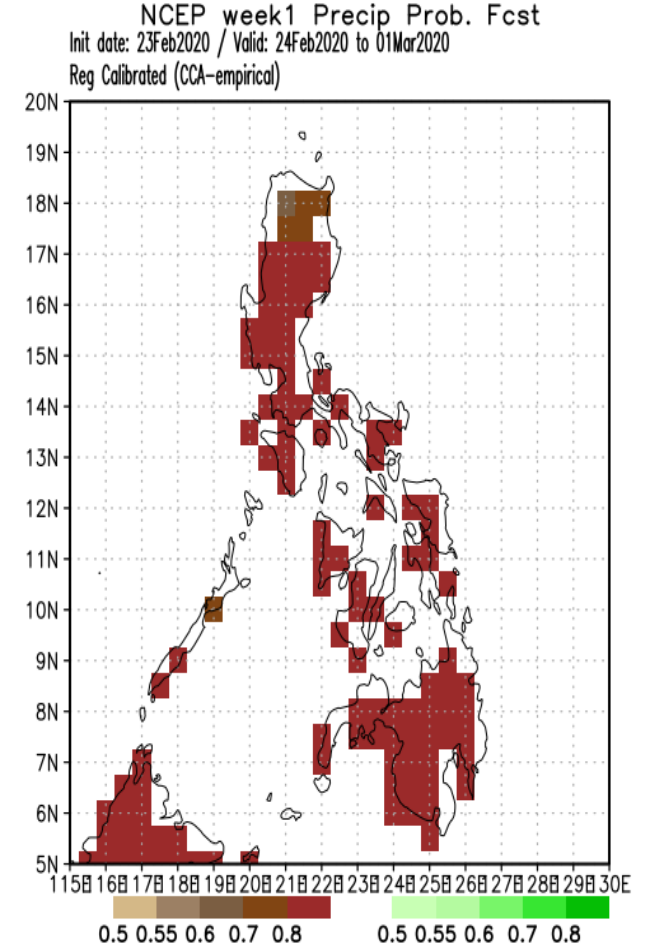

Probability of receiving above normal rainfall in most parts of the country is expected.

PCA

Probability of receiving below normal rainfall in most parts of the country is expected.

CCA

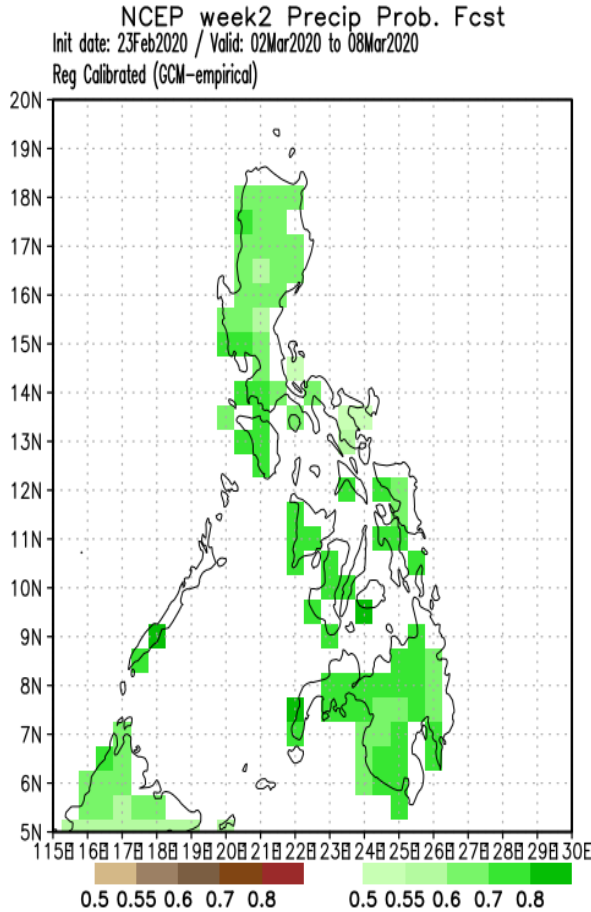

Probability of receiving below normal rainfall in most parts of the country is expected.

Idate: Feb 23, 2019

**Week 2 Forecast
Mar 2 – Mar 8, 2020**

GCM

Probability of receiving above normal rainfall in most parts of the country is expected.

PCA

Probability of receiving below normal rainfall in most parts of the country is expected.

CCA

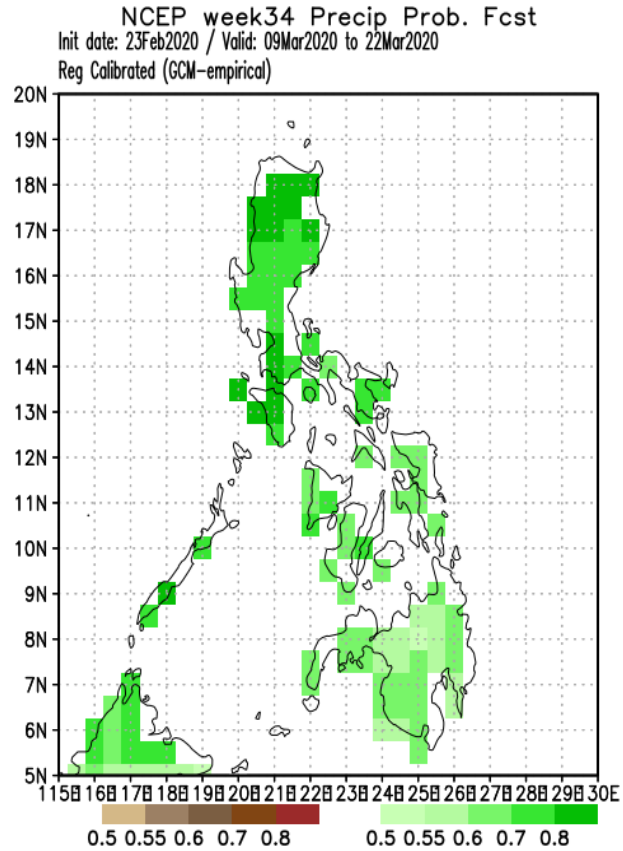

Probability of receiving below normal rainfall in most parts of the country is expected.

Idate: Feb 23, 2020

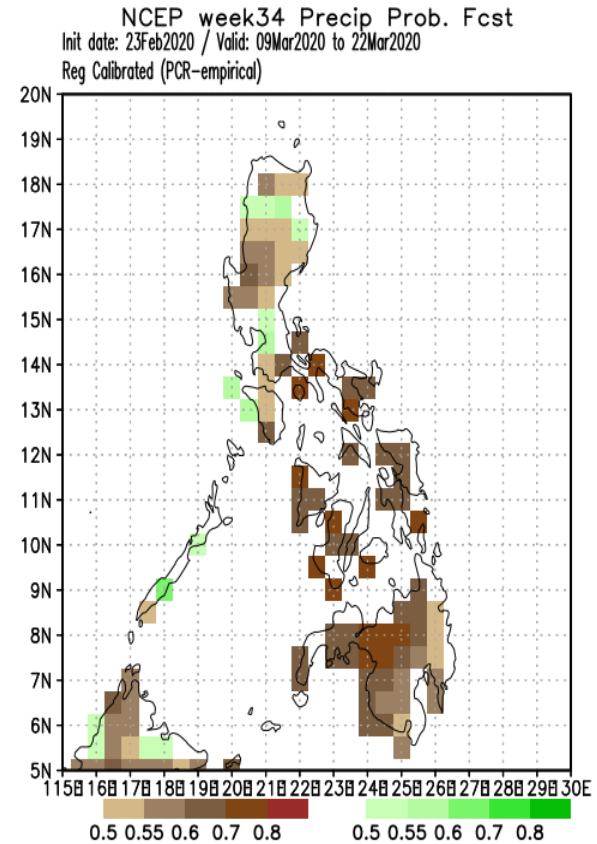

Week 3-4 Forecast Mar 09 - 22, 2020

GCM

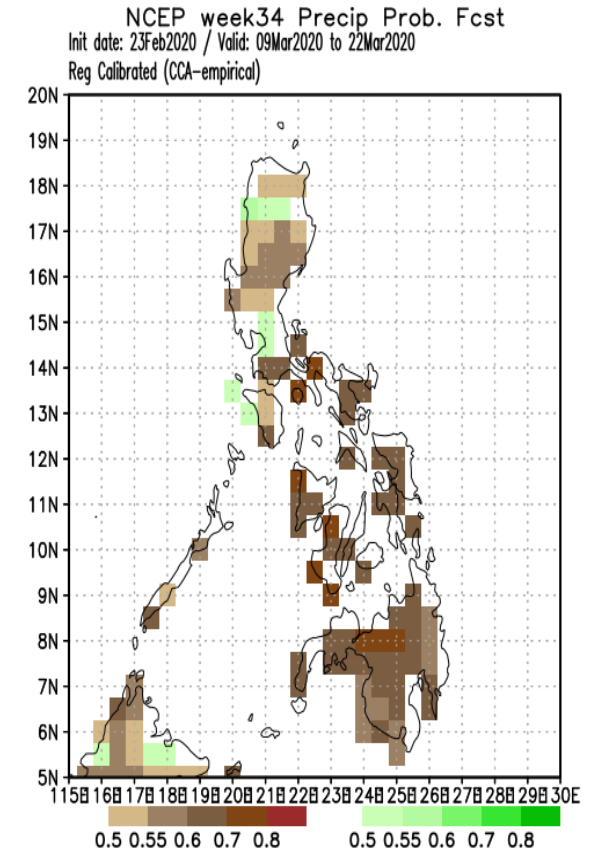

Probability of receiving above normal rainfall in most parts of the country is expected.

PCA

Probability of receiving below normal rainfall in most parts of the country is expected.

CCA

Probability of receiving below normal rainfall in most parts of the country is expected.

Idate: Feb 23, 2020

10 days Forecast
Feb 24 – Mar 3, 2020

GCM

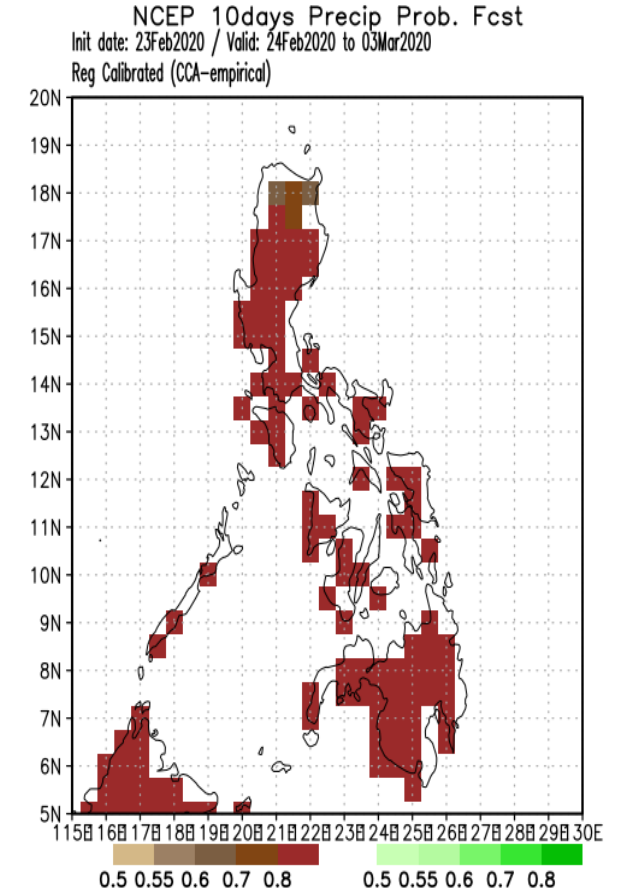

Probability of receiving above normal rainfall in most parts of the country is expected.

PCA

Probability of receiving below normal rainfall in most parts of the country is expected.

CCA

Probability of receiving below normal rainfall in most parts of the country is expected.
