SUMMARY

- **Today:** The Northeast monsoon may bring mostly cloudy skies with rains over Cagayan Valley, Apayao, Kalinga, Aurora, and Quezon. Eastern Visayas, Caraga, and Davao Oriental may experience mostly cloudy skies with scattered rainshowers due to Easterlies. The rest of the country will be partly cloudy to cloudy with possible light rains over the rest of Luzon and isolated rainshowers elsewhere.
- **Tomorrow and Friday:** The whole country may experience fair weather conditions due to the ridge of High Pressure area and Easterlies. Warmer weather with brief showers is possible especially over the eastern sections.
- The suspected Low Pressure Area (LPA) is not expected to intensify further and may dissipate in the next days. It is also not expected to enter the Philippine Area of Responsibility.
