Crop Stage (CS) highlighted in **black** is the dominant stage during the month of October

Rice CS: (I) Nursery (II) Vegetative (III) Reproductive (IV) Ripening
Corn CS: (I) Establishment (II) Vegetative (III) Reproductive (IV) Maturity
CCI Category: Inadequate Sufficient Excess

Regional Summary

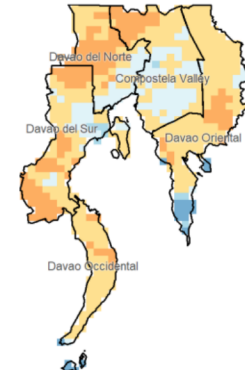

The prevailing activity for the whole region was harvesting or pre-planting of both rice and corn crops. The rainfall received for the month was sufficient which was favorable for the pre-planting activities of rice crops in most of the region except in Davao Occidental and Davao Oriental.

The SPEI3 shows generally near normal conditions experienced for the past three months in most parts of the region. Meanwhile, some portions of Davao del Norte, Davao del Sur, and Davao Oriental experienced slightly drier than normal conditions with slightly wetter in southern portion of Davao Oriental. There was no significant extreme rainfall that could potentially damage rice or corn crops in the whole region.
