(I) Nursery
(II) Vegetative
(III) Reproductive
(IV) Ripening

Corn CS:
(I) Establishment
(II) Vegetative
(III) Reproductive
(IV) Maturity

CCI Category:
Inadequate
Sufficient
Excess

Regional Summary

The farm areas in the region were generally in the pre-planting stage. The rainfall for the month was inadequate which may have caused damage in remaining rice and corn crops in Zamboanga Peninsula. Additionally, the SPEI3 indicates generally slightly drier than normal condition in the region with notably drier than normal condition in some areas between Zamboanga del Norte and Zamboanga del Sur.

There was no significant rainfall that could cause damage in rice and corn crops in the region, as seen in the extreme rainfall indices.
