

Issued: 06 October 2022

OVERVIEW

La Niña continues to persist in the tropical Pacific, as reflected by below average (≤ -0.5 to -1.0°C) sea surface temperature anomalies (SSTAs). Majority of climate models suggest La Niña is likely to continue until DecJan-Feb (DJF) 2022-23 and then transition to ENSO-neutral condition afterwards

La Niña increases the likelihood of having above normal rainfall conditions across most areas of the country. Adverse impacts such as flooding and landslides are still expected over vulnerable areas and sectors of the country.

Assessment in September 2022

WEATHER SYSTEMS THAT AFFECTED THE COUNTRY

SOUTHWEST MONSOON (HABAGAT)

Warm moist winds from the southwest causing rains over the western portion of the country from May to September

LOW PRESSURE AREA (LPA)

Areas of lowest pressure characterized by cloudiness and rainshowers; areas where a tropical cyclone can form

INTERTROPICAL CONVERGENCE ZONE (ITCZ)

Series of low pressure areas brought about by converging northeast (NE) and southeast (SE) winds that cause thunderstorms and rainshowers

Warm winds blowing from the east that may bring cloudiness over the eastern part of the country

Isolated heavy and dense dark clouds with one or more sudden electric discharges manifested by lightning and thunder often accompanied by showers

4 TROPICAL CYCLONE

- Typhoon (TY)" Inday" (Sept. 7-12)
- Super Typhoon (STY) "Josie" (Sept. 16)
- STY "Karding" (Sep 22-26)
- Severe Tropical Storm "Luis" (Sept. 28-29)

RAINFALL CONDITION

+20% or -20%

NEAR Normal

ABOVE NORMAL

120% greater than the normal

most parts of Luzon, Visayas, Zamboanga Peninsula, Northern Mindanao and BARRM

20%-60% reduction from the normal

CAR, rest of Region II, rest of Panay and most parts of Mindanao

TEMPERATURE

Generally, near to slightly warmer than average surface temperatures were felt in most parts of the country except for some areas in MIMAROPA, Calayan, Cagayan and Daet, Camarines Norte where slightly cooler to cooler than average surface temperatures were experienced.

Mountainous Luzon 15.3°C – 25.6°C

Lowlands Luzon 19.1°C – 36.8°C =

Metro Manila 23.3°C – 35.3°C

Visayas 22.7°C – 36.8°C -

Mountainous Mindanao 17.4°C – 33.0°C

<u>-</u>

Lowlands Mindanao 21.2°C – 36.5°C

Issued: 06 October 2022

Outlook in October 2022

EXPECTED WEATHER SYSTEMS

NORTHEAST MONSOON (AMIHAN)

Cold and drier winds from the northeast bring rains over the eastern side of the country *Transition to Northeast

Monsoon

LOW PRESSURE AREA (LPA)

Areas of lowest pressure characterized by cloudiness and rainshowers; areas where a tropical cyclone can form

EASTERLIES

Warm winds blowing from the east that may bring cloudiness over the eastern part of the country

RIDGE OF HIGH PRESSURE AREA (HPA)

An extension of a high pressure area characterized by very light wind and clear skies

IIII INTERTROPICAL CONVERGENCE ZONE (ITCZ)

Series of low pressure areas brought about by converging northeast (NE) and southeast (SE) winds that cause thunderstorms and rainshowers

LOCALIZED THUNDERSTORM

Isolated heavy and dense dark clouds with one or more sudden electric discharges manifested by lightning and thunder often accompanied by showers of rain.

2 or 4 TROPICAL CYCLONES

"Bagyo"; may refer to tropical depression, tropical storm, severe tropical storm, typhoon, or super typhoon.

RAINFALL CONDITION

ABOVE NORMAL

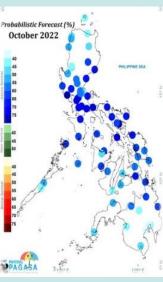

120% greater than the normal

Most areas of the country

High probability on most areas of the country

TEMPERATURE

Generally, near average to slightly warmer than average surface air temperatures are predicted in most parts of Luzon and Visayas while near to slightly cooler than average is expected in Mindanao.

Mountainous Luzon 13.0°C to 26.5°C

> Lowlands Luzon 16.0°C to 36.5°C

Metro Manila 21.5°C to 35.0°C

Visayas 20.0°C to 35.5°C Mountainous Mindanao 15.0°C to 33.5°C

Lowlands Mindanao 20.0°C to 37.5°C
