

MONTHLY CLIMATE ASSESSMENT AND OUTLOOK

Issued: 08 April 2025

OVERVIEW

El Niño Southern Oscillation (ENSO)-neutral conditions are present in the tropical Pacific, as indicated in the recent analyses of sea surface temperature anomalies transitioned from La Niña conditions to ENSOneutral levels. Most climate models suggest that the ENSO-neutral conditions are likely to persist through the September-October-November 2025 season.

Furthermore, as the warm and dry season persists, the public and all concerned government agencies are urged to sustain precautionary measures to minimize heat stress and prevent associated health risks.

Assessment in March 2025

WEATHER SYSTEMS THAT AFFECTED THE COUNTRY

NORTHEAST MONSOON (AMIHAN)

Cold and drier winds from the northeast bring rains over the eastern side of the country

EASTERLIES

Warm winds blowing from the east may bring cloudiness over the eastern part of the country

LOCALIZED THUNDERSTORM

Warm Isolated heavy and dense dark clouds with one or more sudden electric discharges manifested by lightning and thunder often accompanied by showers of

INTERTROPICAL CONVERGENCE ZONE (ITCZ)

Series of low pressure areas brought about by converging Northeast (NE) and Southeast (SE) winds that cause thunderstorms and rainshowers

SHEAR LINE

Zone of converging winds associated with the extension of a frontal system that often brings thunderstorms and rainshowers

LOW PRESSURE AREA (LPA)

of lowest characterized by cloudiness and rainshowers; areas where a tropical cyclone can form

RAINFALL CONDITION

most parts of the country

northwestern and central Luzon, southeastern Mindanao and MIMAROPA

TEMPERATURE

Mean surface air temperatures observed across the country were near-average to above-average.

Mountainous Luzon 12.1°C - 27.4°C

Lowlands Luzon 18.4°C - 37.4°C

Metro Manila 21.4°C - 35.5°C

Visayas 21.5°C - 35.0°C

Mountainous Mindanao 17.0°C - 34.4°C

Lowlands Mindanao 21.8°C - 35.4°C

MONTHLY CLIMATE ASSESSMENT AND OUTLOOK

Issued: 08 April 2025

Outlook in April 2025

EXPECTED WEATHER SYSTEMS

LOCALIZED THUNDERSTORM

Warm Isolated heavy and dense dark clouds with one or more electric discharges manifested by lightning and thunder often accompanied by showers of

SHEAR LINE

converging associated with the extension of a frontal system that often brings thunderstorms and rainshowers

INTERTROPICAL CONVERGENCE ZONE (ITCZ)

Series of low pressure areas brought about by converging Northeast (NE) and Southeast (SE) winds that cause thunderstorms and rainshowers

RIDGE OF HIGH PRESSURE AREA (HPA)

An extension of a high pressure area characterized by a very light wind and clear skies

EASTERLIES

Warm winds blowing from the east may bring cloudiness over the eastern part of the

LOW PRESSURE AREA (LPA)

Areas of lowest pressure characterized by cloudiness and rainshowers; areas where a tropical cyclone can form

PASSAGE OF 0 or 1 TROPICAL CYCLONE OR BAGYO

"Bagyo"; may refer to tropical depression, tropical storm, severe tropical storm, typhoon, or super typhoon.

RAINFALL CONDITION

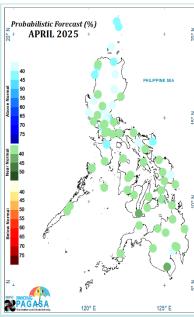

most parts of the country

Bataan and Cavite

TEMPERATURE

Generally, near to above average surface air temperatures are expected across most parts of the country, except for portions of MIMAROPA and northwestern Luzon, where slightly below average temperatures may be expected.

Mountainous Luzon 12.5°C - 28.8°C

> Lowlands Luzon 18.5 °C - 39.3 °C

Metro Manila 20.1°C - 38.1°C

Visayas 20.7°C - 37.0°C Mountainous Mindanao 14.5°C - 35.6°C

Lowlands Mindanao 21.2°C - 38.3°C
