

CPT based Sub-Seasonal Forecasting (Philippines)

NOAA's CPC International Desks

CPT is using NCEP CFSv2 (Climate Forecast Systems V.2) forecasts.

Initial condition: December 12, 2021

The legend is interpreted as probability of below average rainfall for the brown shaded color and probability of above-average rainfall for green shaded color.

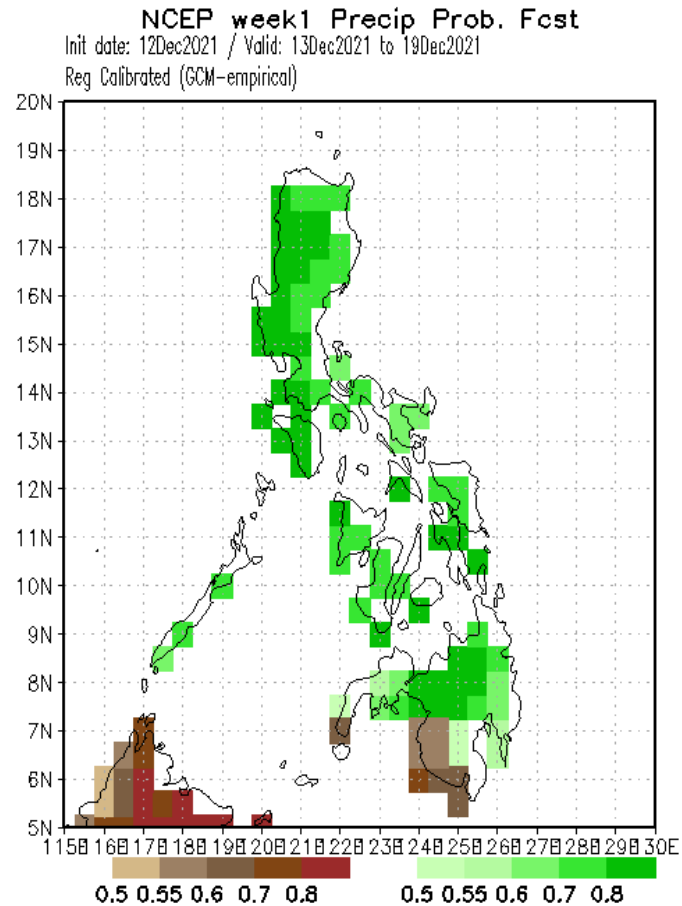

Rundate: 15 December 2021

Idate: Dec 12, 2021

Week 1 Forecast

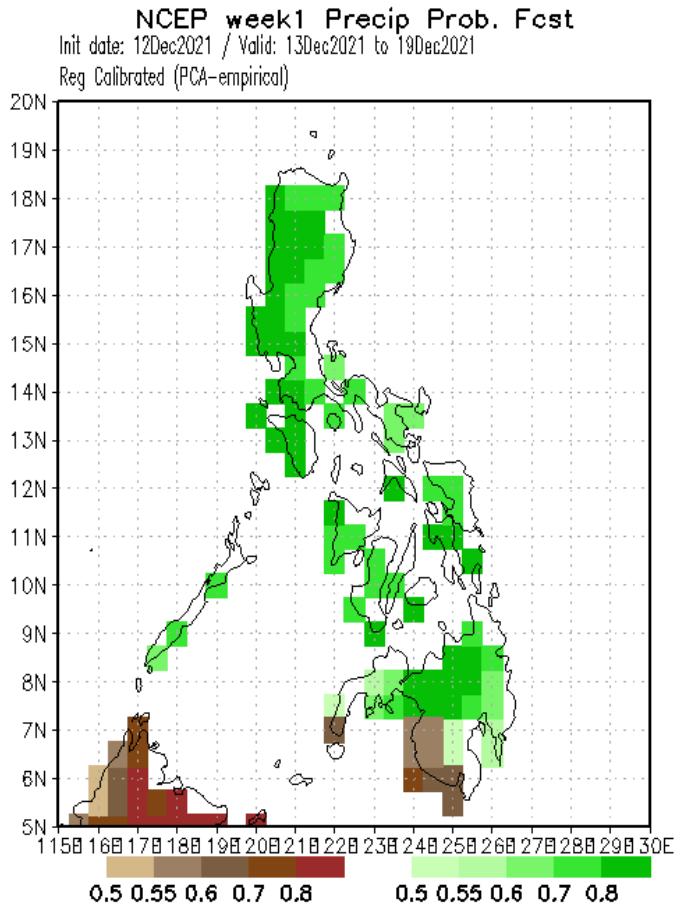

Dec 13-19, 2021

GCM

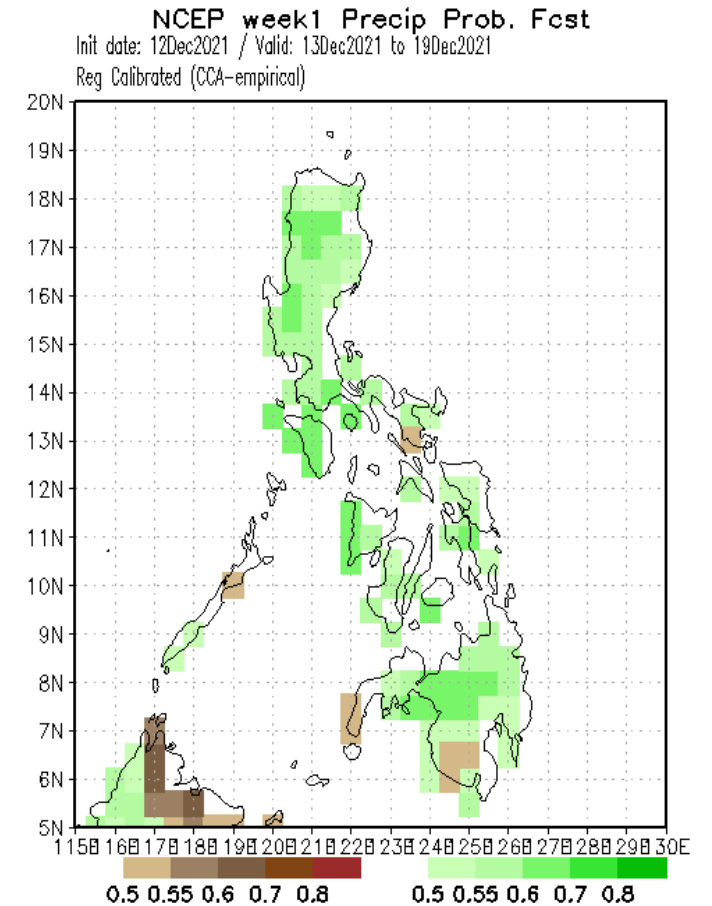

Probability of receiving above normal rainfall in most parts of the country except with some patches of below normal in southwestern Mindanao.

PCA

Probability of receiving above normal rainfall in most parts of the country except with some patches of below normal in southwestern Mindanao.

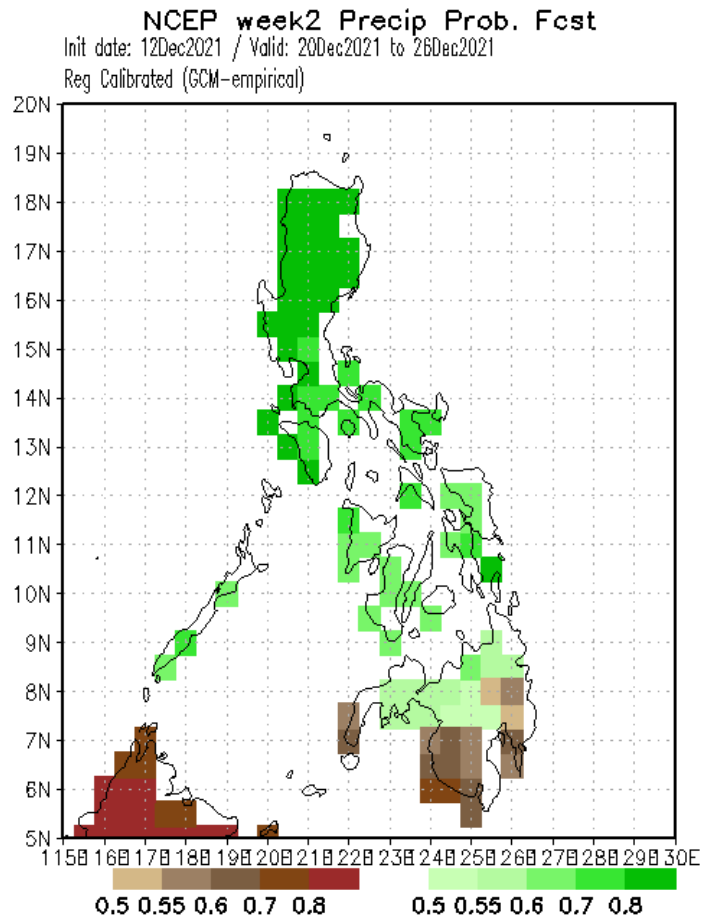

CCA

Probability of receiving above normal rainfall in most parts of the country.

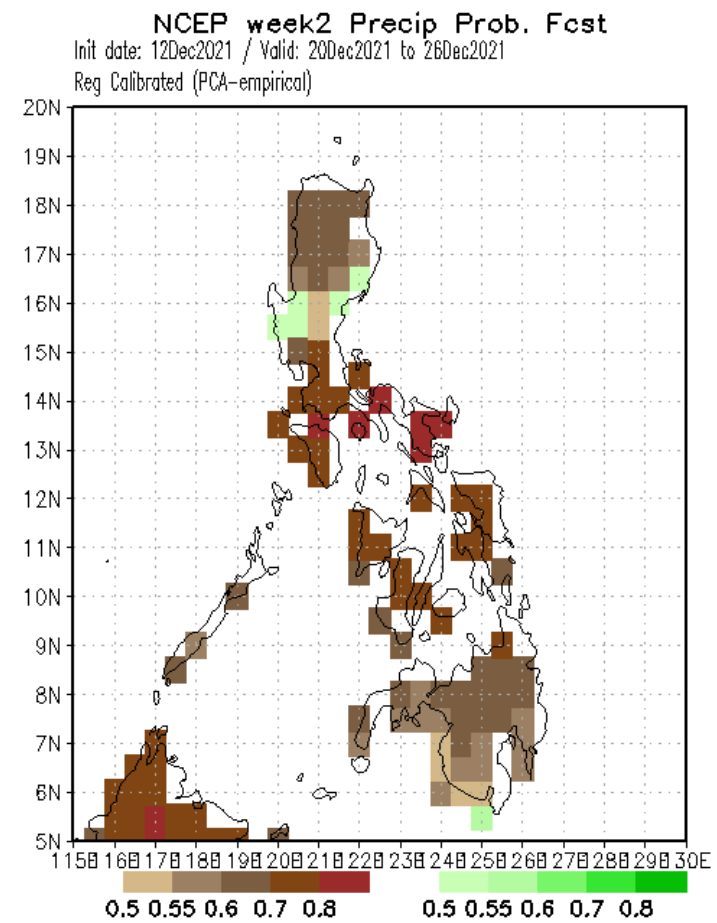

GCM

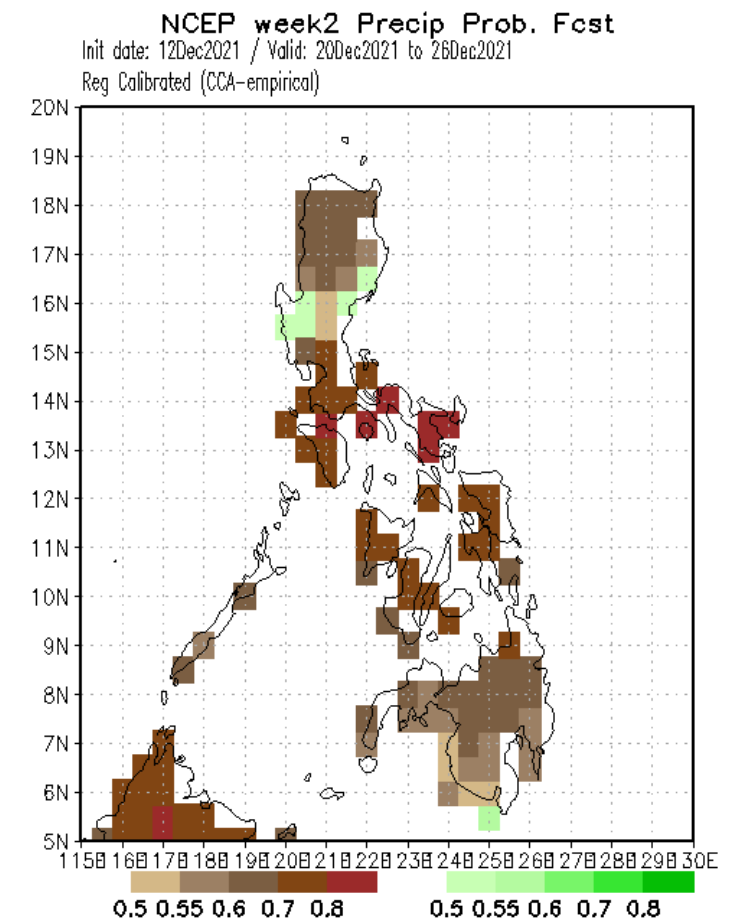

Probability of receiving above normal rainfall in most parts of the country except in southern Mindanao where below normal is more likely.

PCA

Probability of receiving below normal rainfall in most parts of the country.

CCA

Probability of receiving below normal rainfall in most parts of the country.

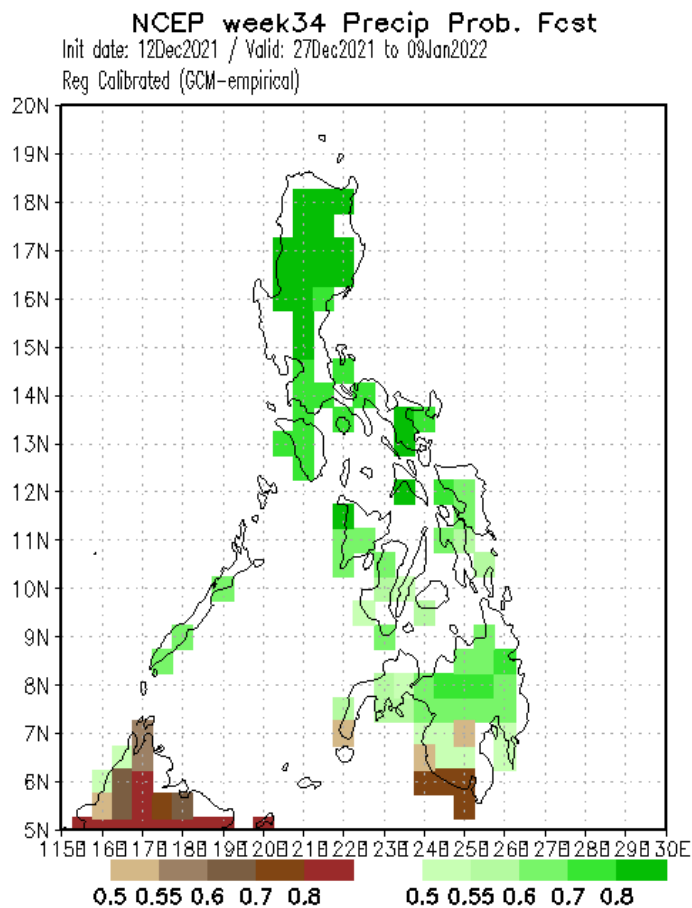

Idate: Dec 12, 2021

Week 3-4 Forecast

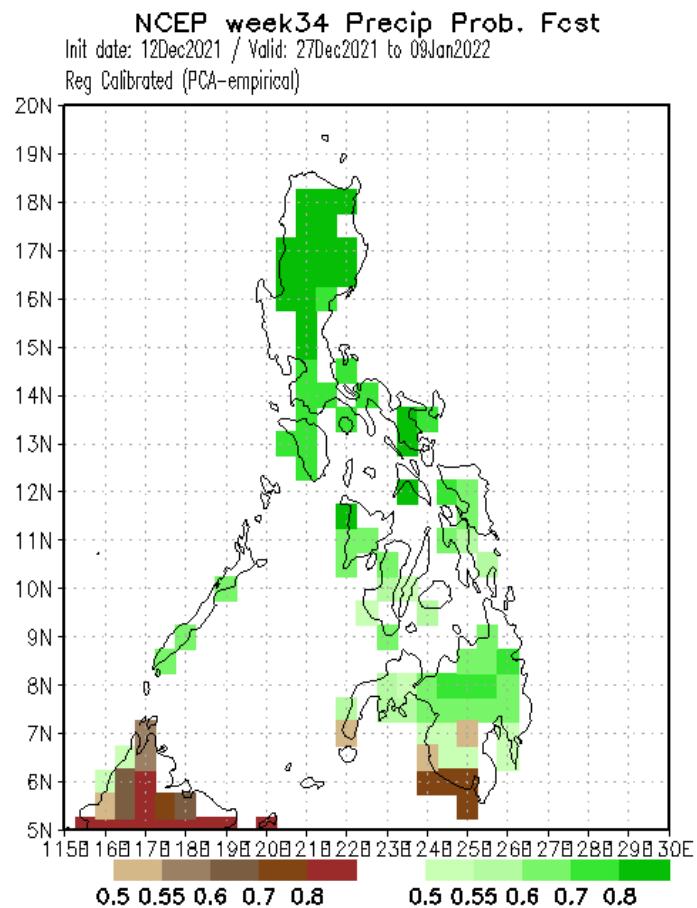

Dec 27- Jan 09, 2021

GCM

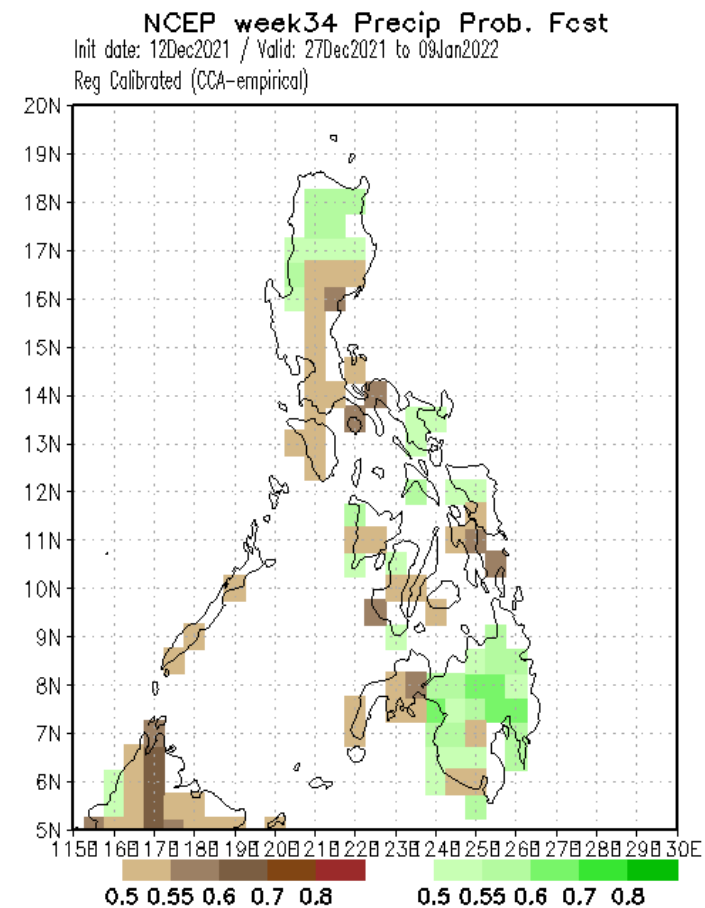

Probability of receiving above normal rainfall in most parts of the country.

PCA

Probability of receiving above normal rainfall in most parts of the country.

CCA

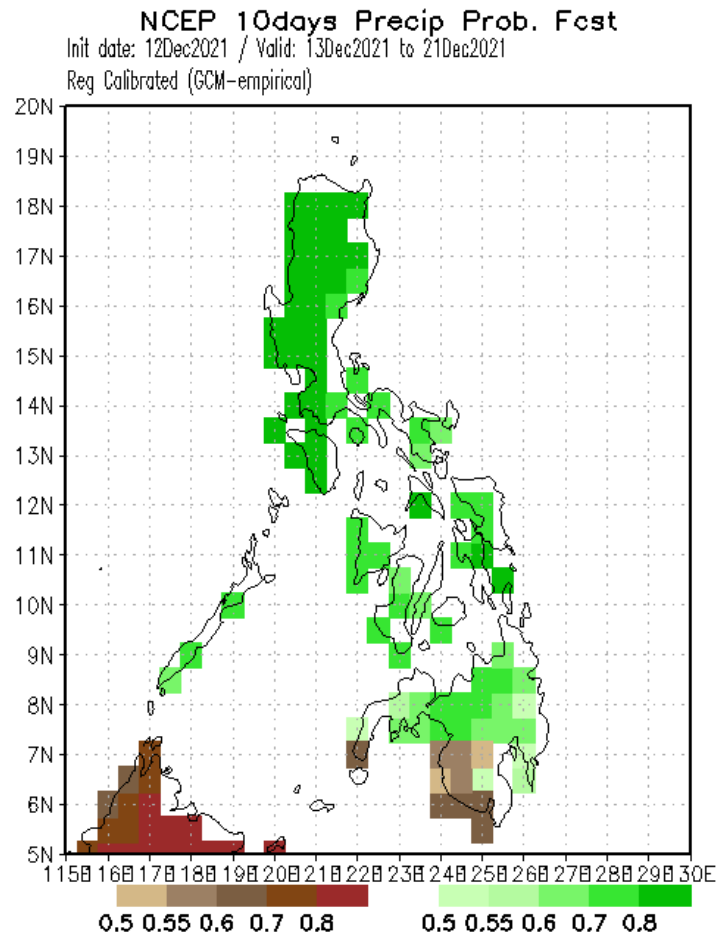

Probability of receiving above normal rainfall in northern Luzon, Bicol Region, Eastern Visayas and most parts of Mindanao while the rest of the country will likely receive below normal rainfall.

Idate: Dec 12, 2021

10 days Forecast

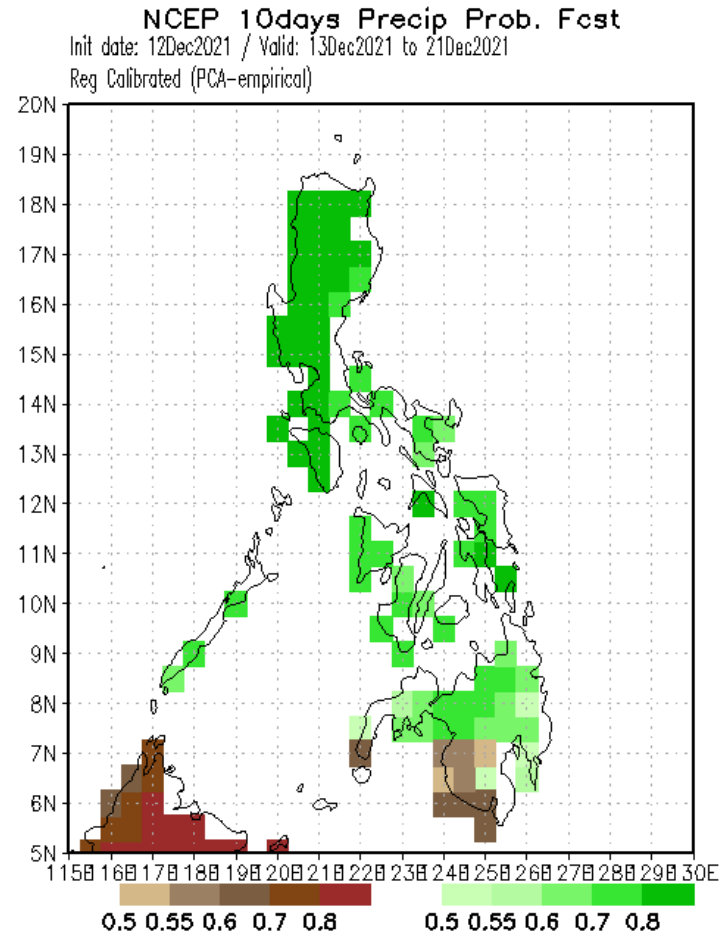

Dec 3-21, 2021

GCM

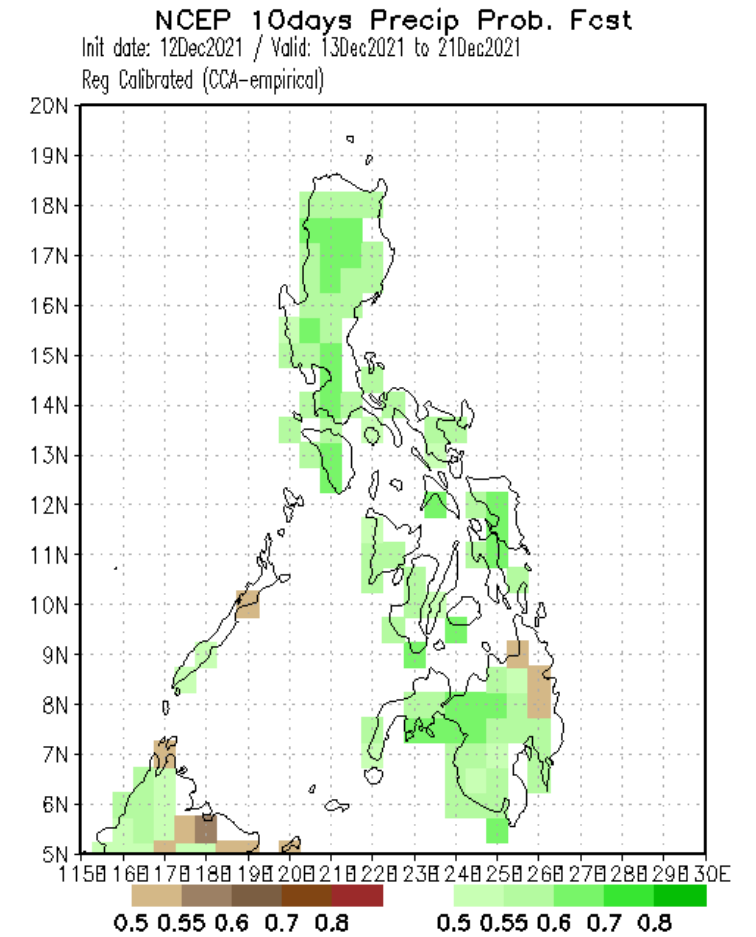

Probability of receiving above normal rainfall in most parts of the country except with some patches of below normal in southwestern Mindanao.

PCA

Probability of receiving above normal rainfall in most parts of the country except with some patches of below normal in southwestern Mindanao.

CCA

Probability of receiving above normal rainfall in most parts of the country.
