

CPT based Sub-Seasonal Forecasting (Philippines)

NOAA's CPC International Desks

CPT is using NCEP CFSv2 (Climate Forecast Systems V.2) forecasts.

Initial condition: October 10, 2024

The legend is interpreted as probability of below average rainfall for the brown shaded color and probability of above-average rainfall for green shaded color.

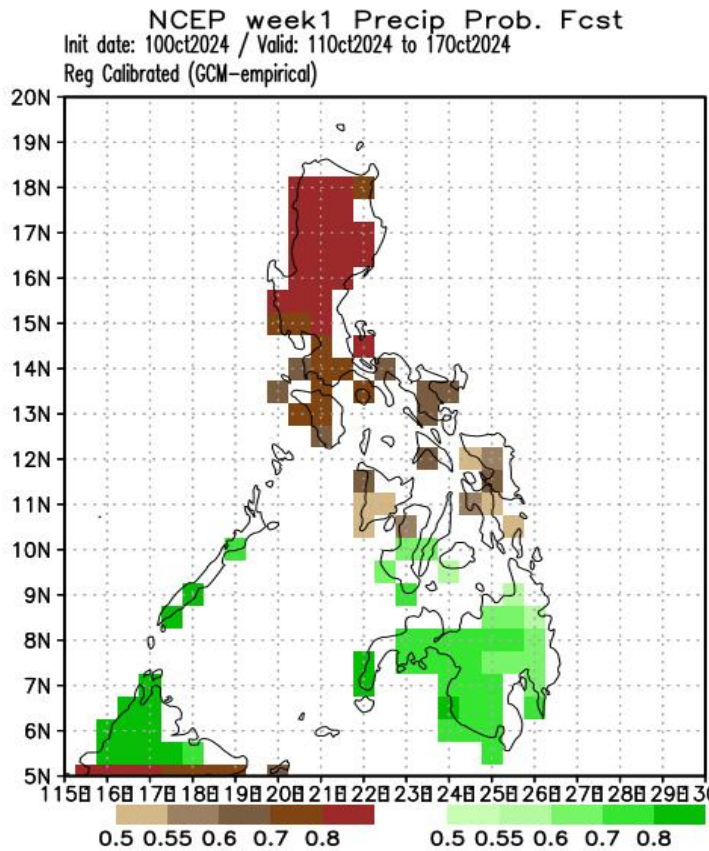

Rundate: 14 October 2024

Idate: 10 October 2024

Week 1 Forecast

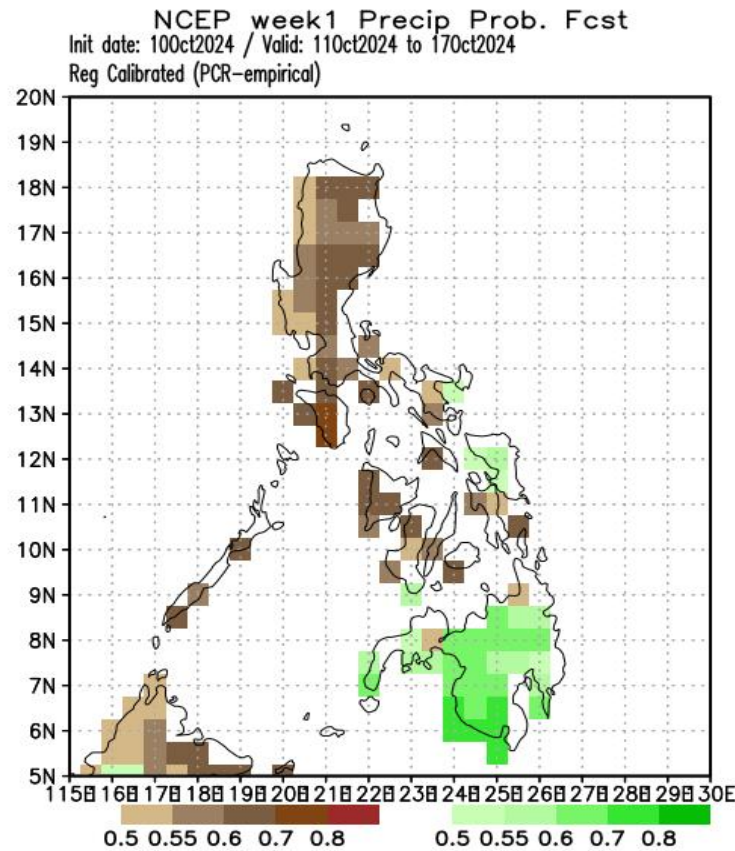

Oct 11-17, 2024

GCM

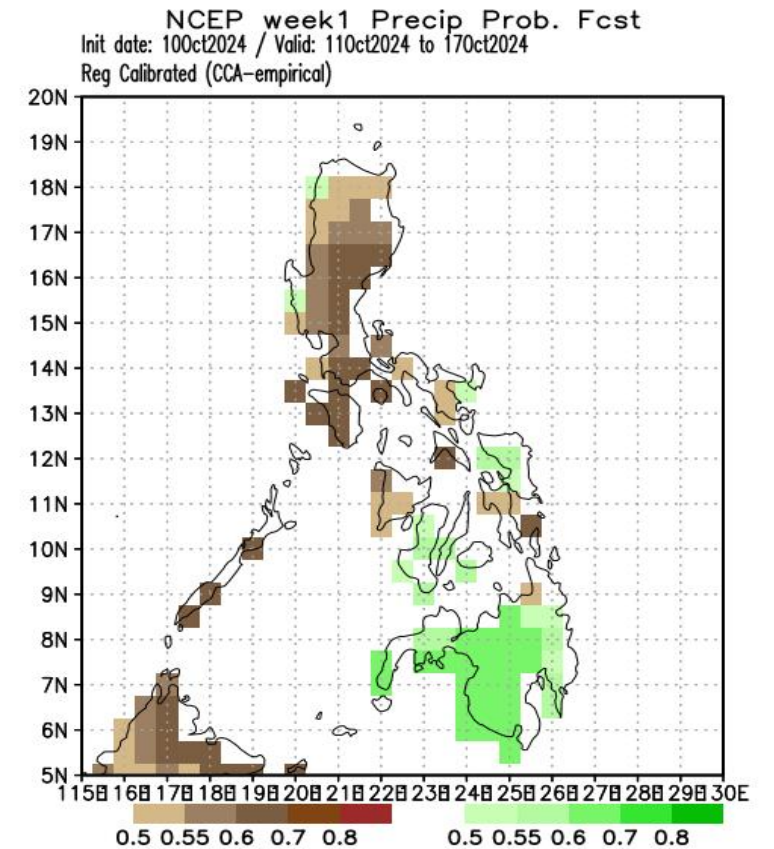

Probability of receiving below normal rainfall in most parts of Luzon, eastern Visayas, Panay Island, and northern part of NIR while the rest of the country will likely have above normal rainfall.

PCA

Probability of receiving below normal rainfall in most parts of Luzon and Visayas while Samar provinces and most parts of Mindanao will likely have above normal rainfall.

CCA

Probability of receiving below normal rainfall in most parts of Luzon, Leyte provinces, and Panay Island while the rest of the country will likely have above normal rainfall.

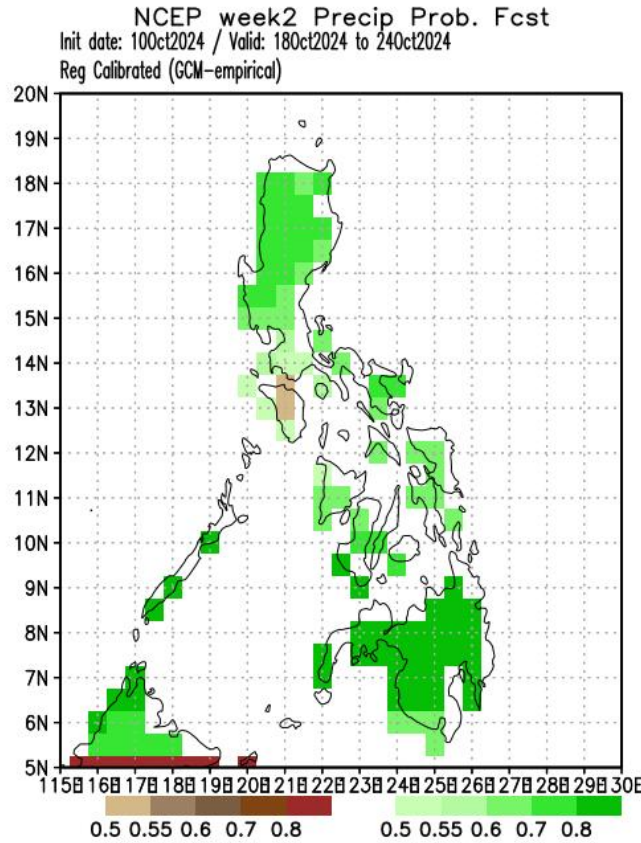

Idate: 10 October 2024

Week 2 Forecast

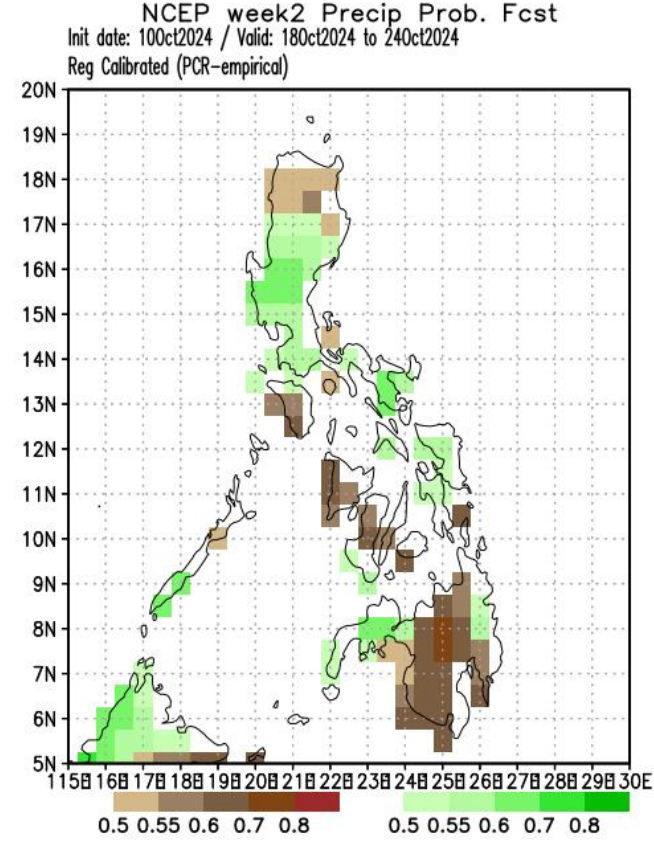

Oct 18-24, 2024

GCM

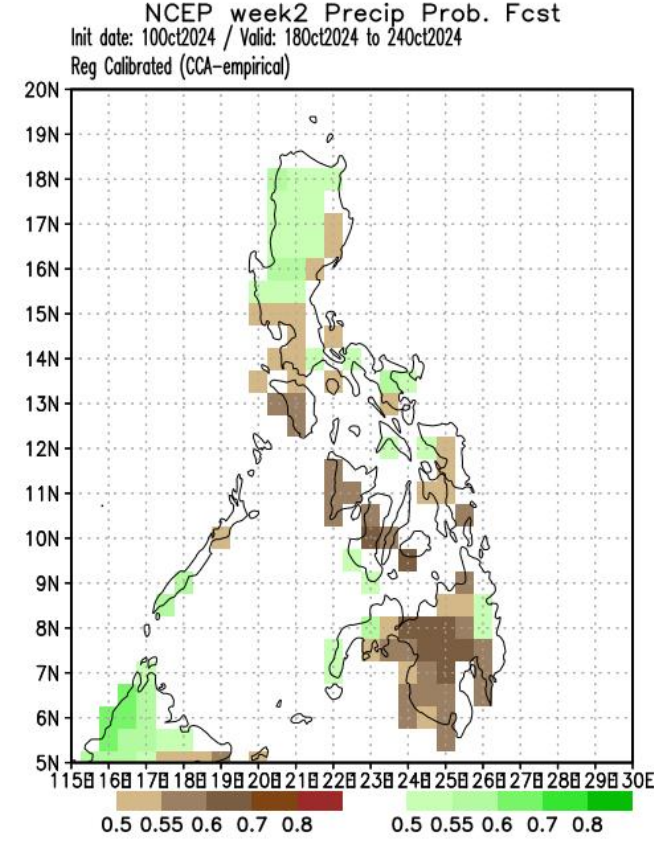

Probability of receiving above normal rainfall in most parts of the country.

PCA

Probability of receiving below normal rainfall in some areas in northern Luzon, Mindoro, western and central Visayas, and most parts of Mindanao while Zamboanga Peninsula, Caraga Region, and the rest of Luzon and Visayas will likely have above normal rainfall.

CCA

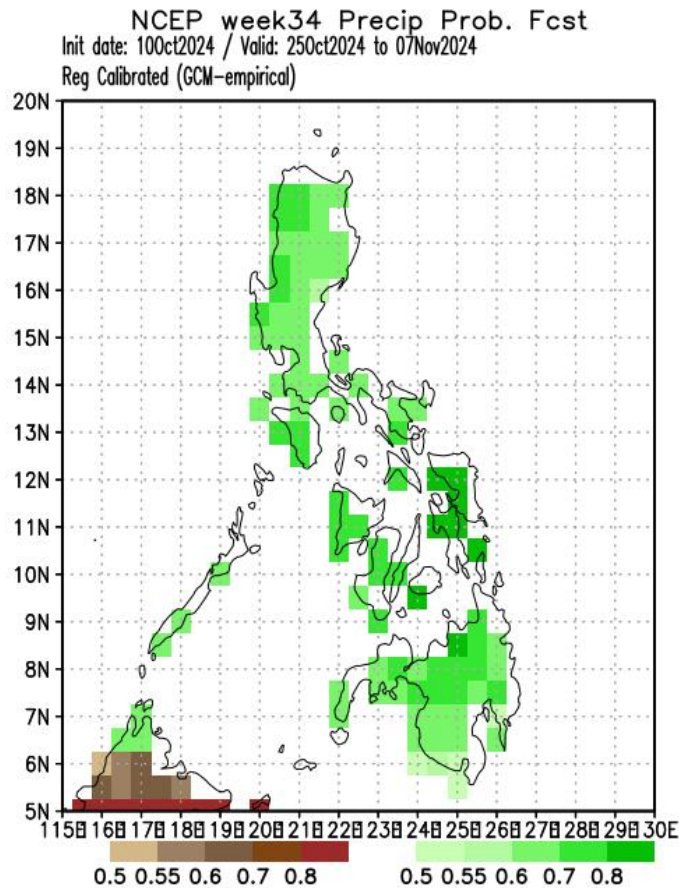

Probability of receiving above normal rainfall in most parts of northern and central Luzon, Bicol Region, and some areas in Zamboanga Peninsula and Caraga Region while the rest of the country will likely have below normal rainfall.

Idate: 10 October 2024

Week 3-4 Forecast

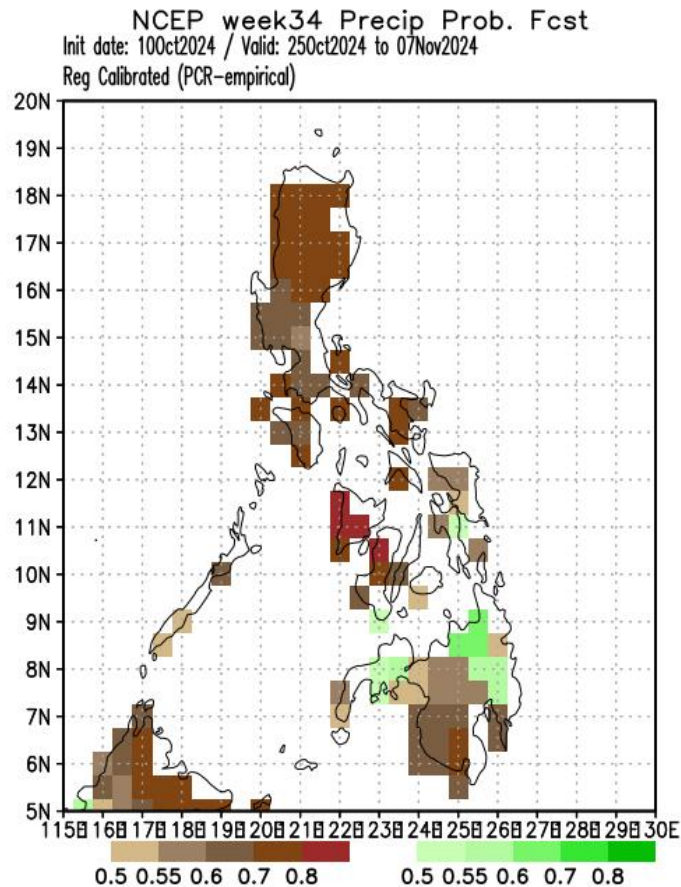

Oct 25-Nov 07, 2024

GCM

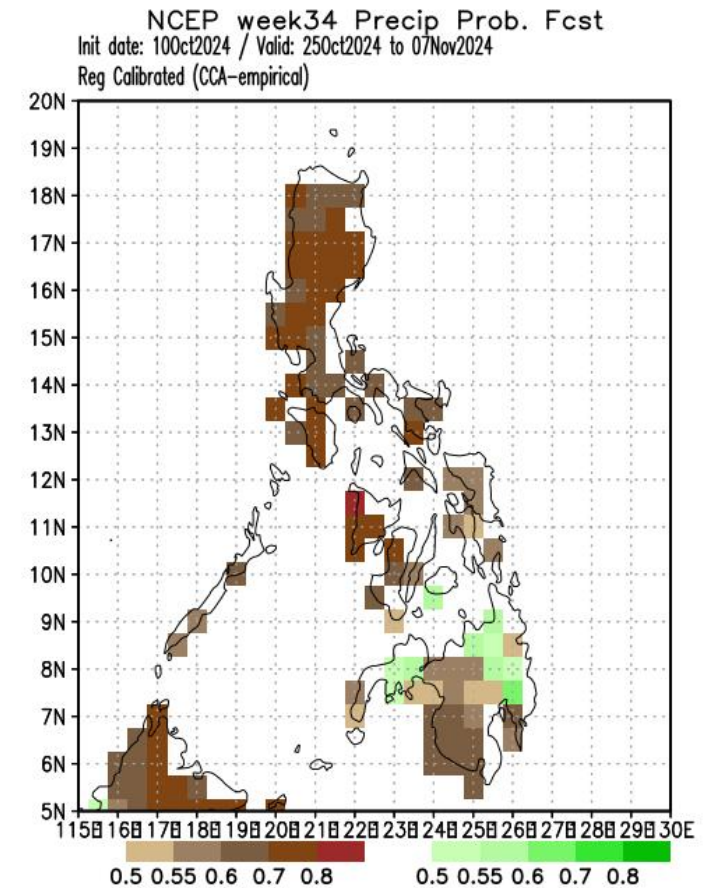

Probability of receiving above normal rainfall in most parts of the country.

PCA

Probability of receiving below normal rainfall in most parts of the country except in Zamboanga Peninsula, Misamis Oriental, and eastern Mindanao where above normal rainfall is more likely .

CCA

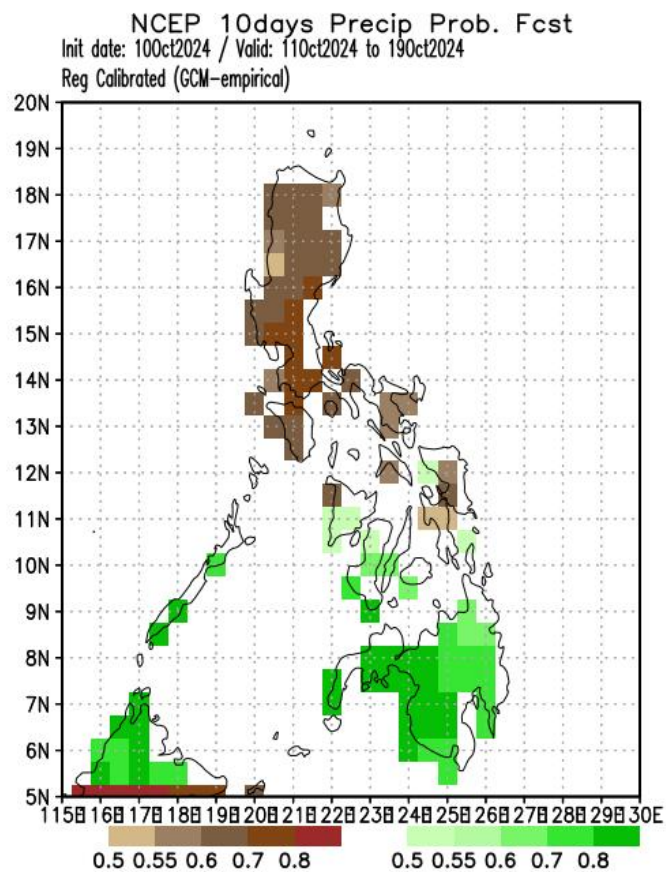

Probability of receiving below normal rainfall in most parts of the country except in Zamboanga Peninsula, Misamis Oriental, and eastern Mindanao where above normal rainfall is more likely .

Idate: 10 October 2024

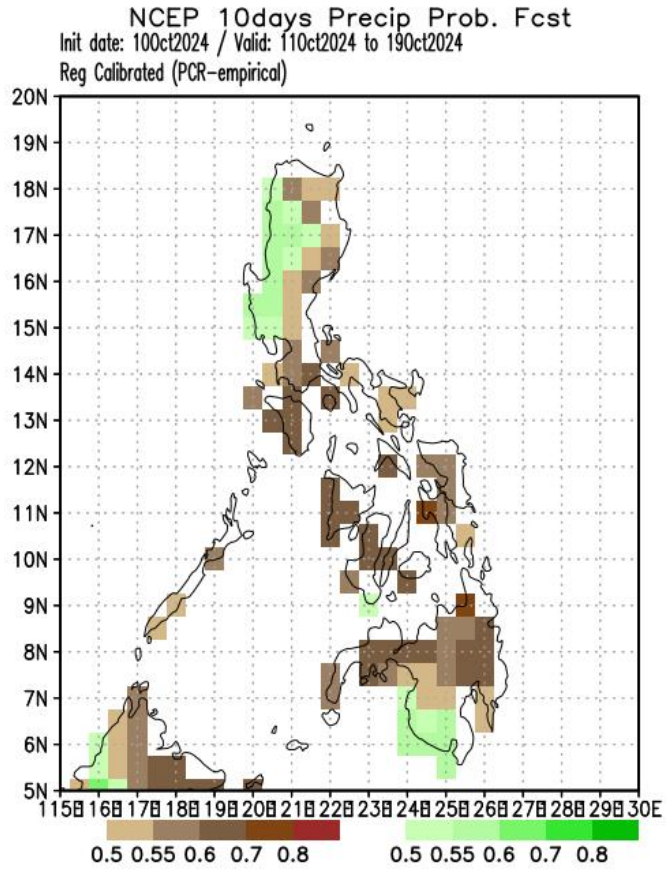

10 days Forecast

Oct 10-19, 2024

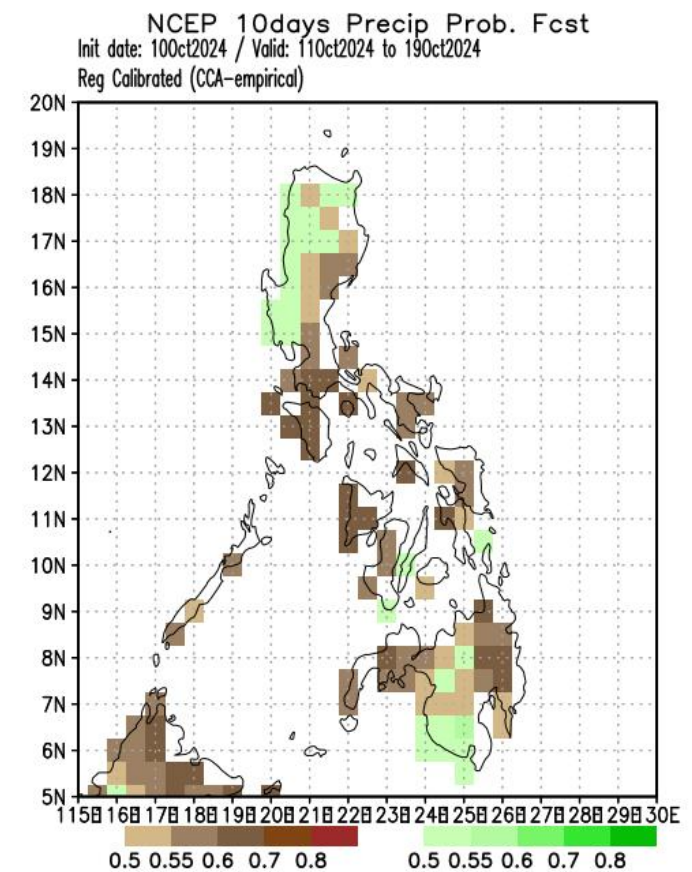

GCM

PCA

CCA

Probability of receiving below normal rainfall in most parts of Luzon and eastern Visayas while the rest of the country will likely have above normal rainfall.

Probability of receiving below normal rainfall in most parts of the country except in some areas in eastern Luzon, CAR, and southwestern Mindanao where above normal rainfall is expected.

Probability of receiving below normal rainfall in most parts of the country except in some areas in northern & eastern Luzon, and central & southwestern Mindanao where above normal rainfall is expected.
