

CPT based Sub-Seasonal Forecasting (Philippines)

NOAA's CPC International Desks

CPT is using NCEP CFSv2 (Climate Forecast Systems V.2) forecasts.

Initial condition: April 12, 2026

The legend is interpreted as probability of below average rainfall for the brown shaded color and probability of above-average rainfall for green shaded color.

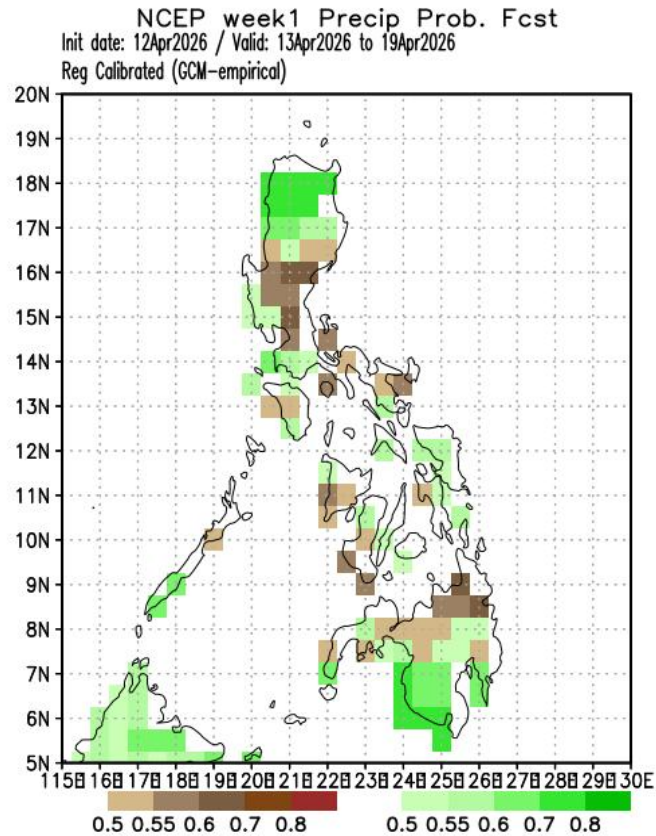

Rundate: 14 April 2026

Idate: April 12, 2026

Week 1 Forecast

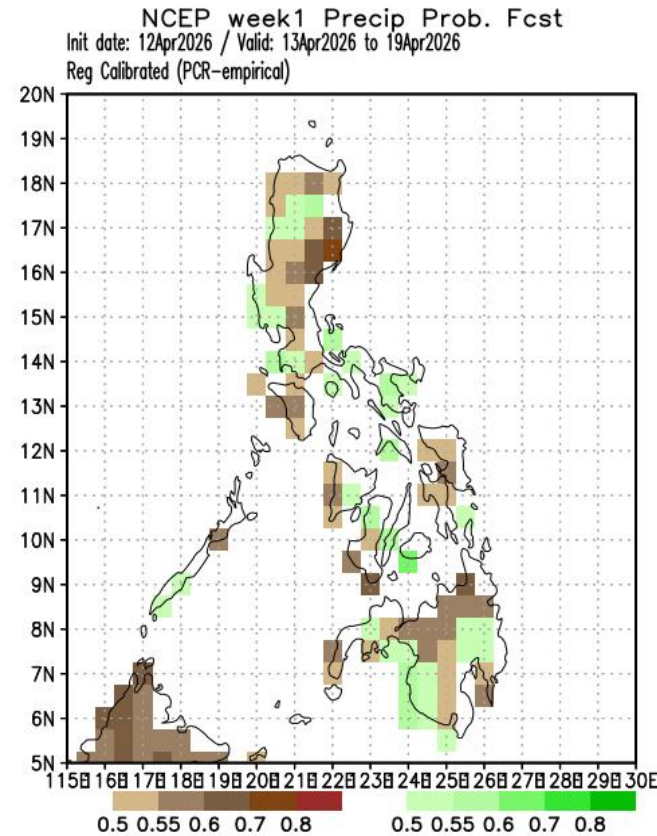

Apr 13-19, 2026

GCM

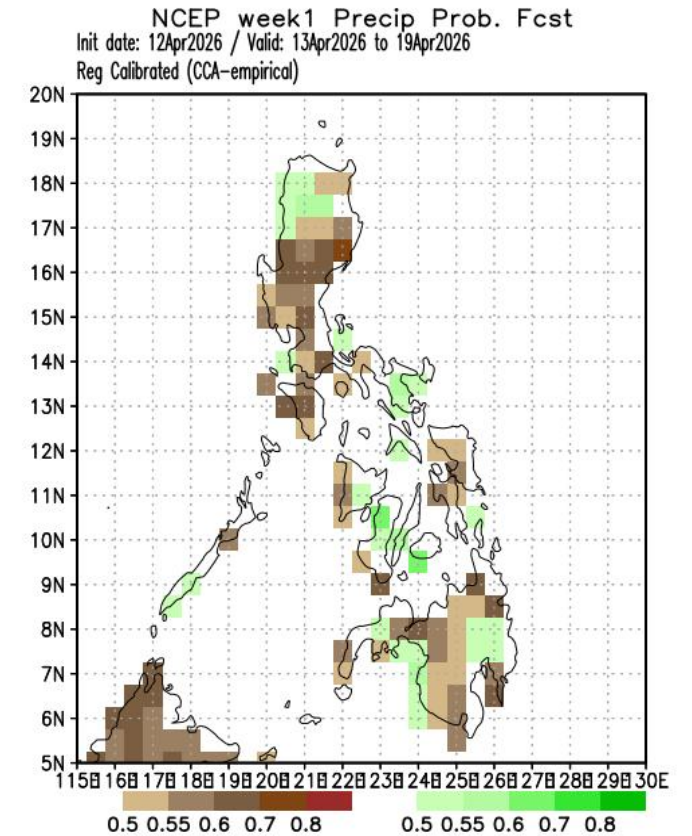

Probability of receiving above normal rainfall in Northern Luzon, western parts of Central Luzon, some areas in Southern Luzon, most parts of Visayas and Mindanao while the rest of Luzon, some areas in western Visayas, and northern Mindanao will likely have below normal rainfall.

PCA

Probability of receiving below normal rainfall in most parts of Luzon, Eastern Visayas, Antique, southern part of Negros Island, and northern & central parts of Mindanao while some areas in Luzon, Bicol Region, and the rest of Visayas and Mindanao will likely have above normal rainfall.

CCA

Probability of receiving below normal rainfall in most parts of the country except in northern parts of Ilocos Region, & CAR, Bicol Region, Western and Central Visayas, Zamboanga Peninsula, and southeastern Mindanao where above normal rainfall is expected.

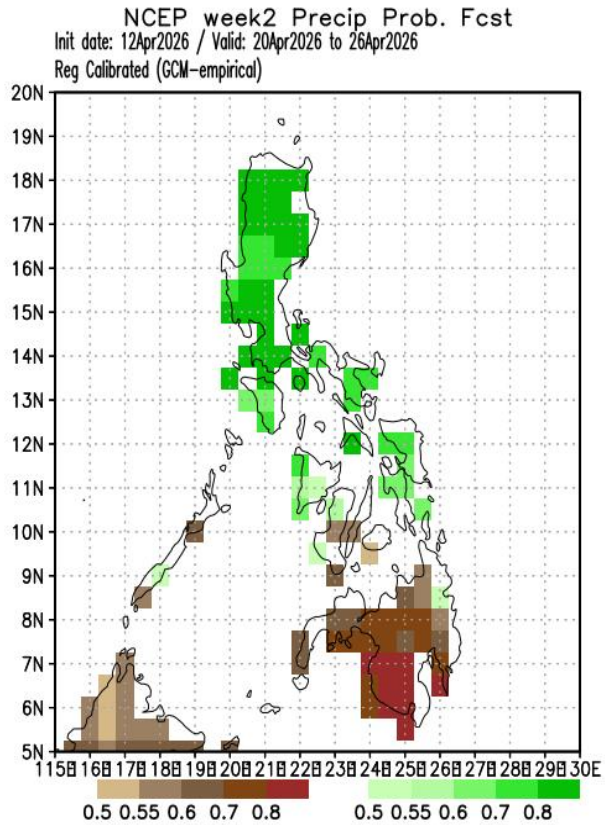

Idate: April 12, 2026

Week 2 Forecast

Apr 20-26, 2026

GCM

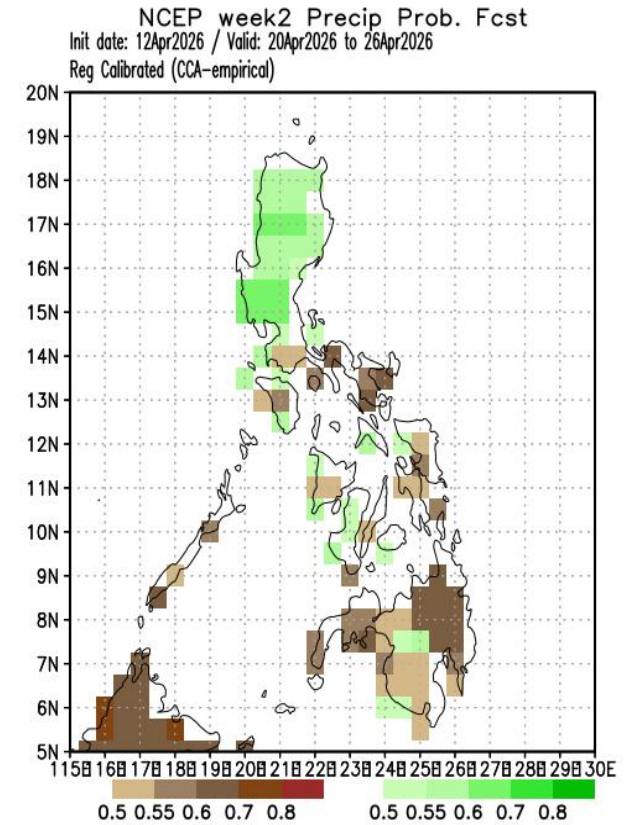

Probability of receiving above normal rainfall in most parts of Luzon and Visayas while Mindanao will likely have below normal rainfall.

PCA

Probability of receiving above normal rainfall in northern parts of Ilocos Region & CAR, some areas in southern Luzon, most parts of Visayas, and Lanao provinces while the rest of the country will likely have below normal rainfall.

CCA

Probability of receiving above normal rainfall in most parts of Luzon, western and Central Visayas, and some areas in Central Mindanao while southern Luzon, Bicol Region, Eastern Visayas and most parts of Mindanao will likely have below normal rainfall.

Idate: April 12, 2026

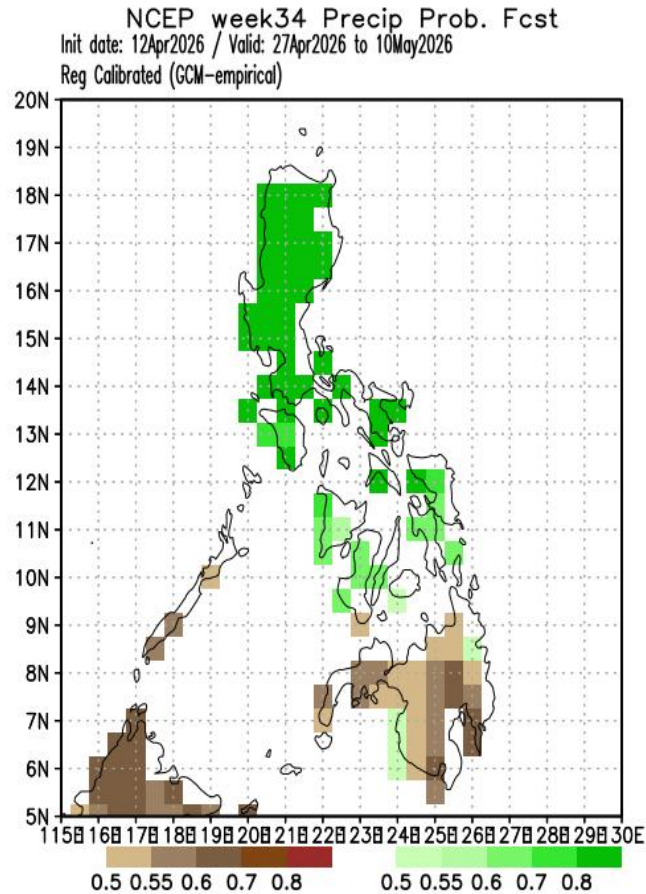

Week 3-4 Forecast

Apr 27- May 10, 2026

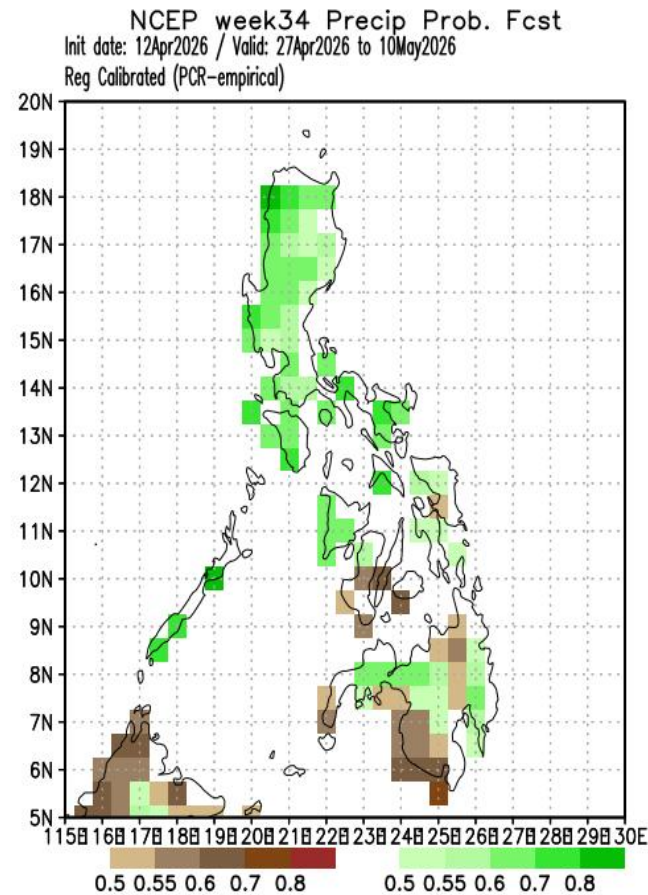

GCM

PCA

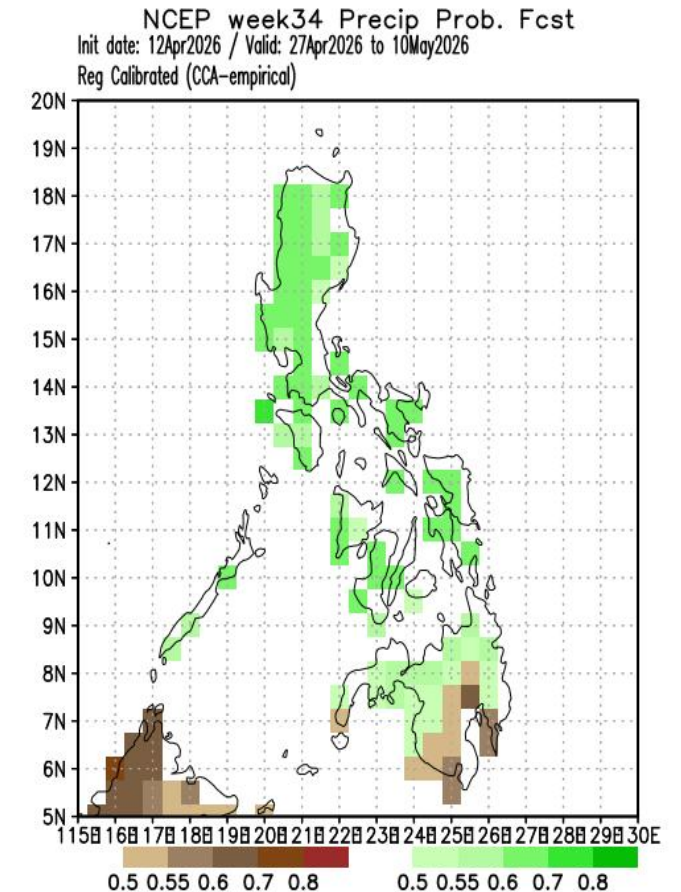

CCA

Probability of receiving above normal rainfall in most parts of Luzon and Visayas while Mindanao will likely have below normal rainfall.

Probability of receiving above normal rainfall in most parts of the country except in some areas in western and central Visayas, and western Mindanao where below normal rainfall is expected.

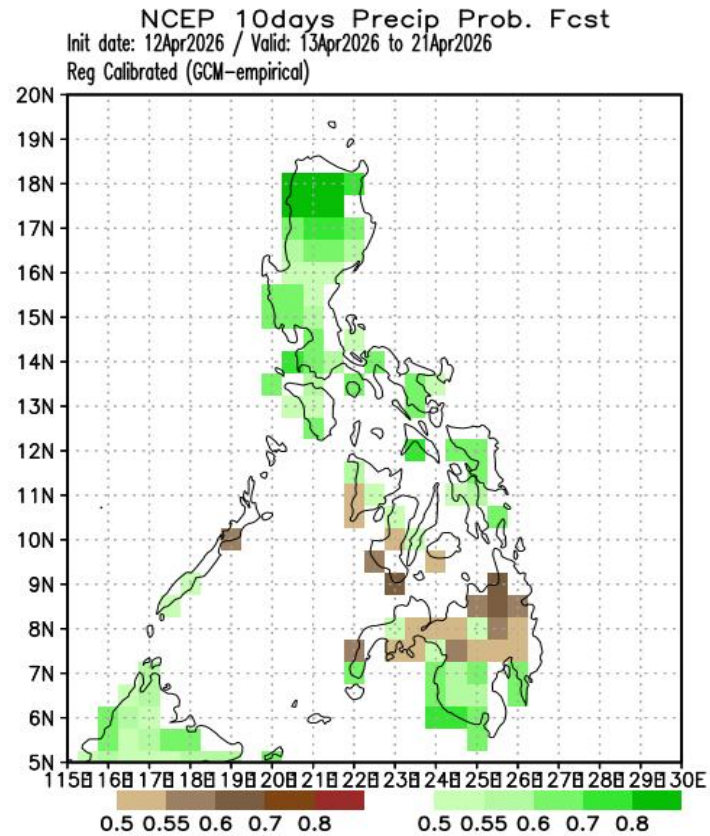

Probability of receiving above normal rainfall in most parts of the country except in some areas in southern Mindanao where below normal rainfall is expected.

Idate: April 12, 2026

10 days Forecast

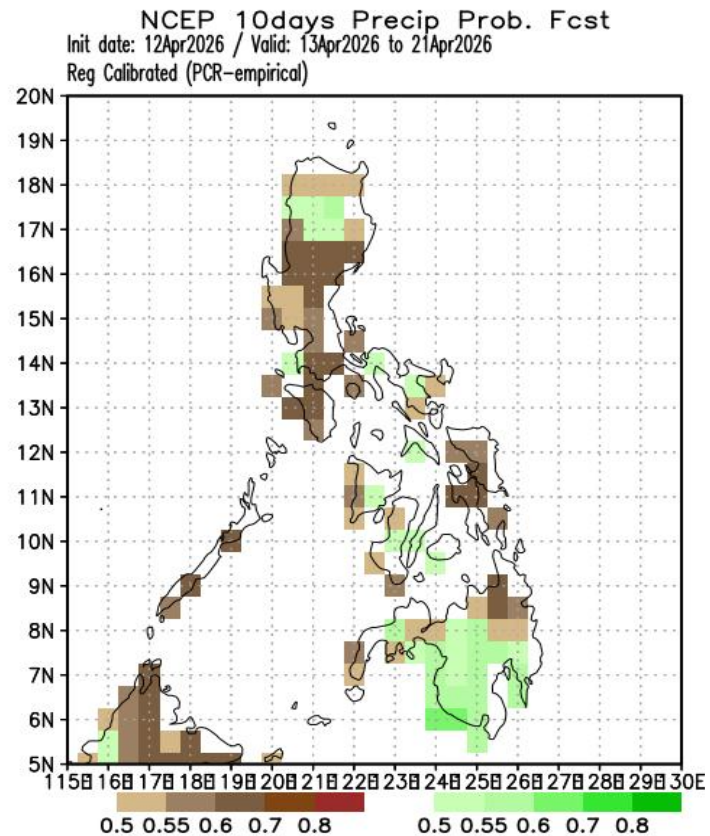

Apr 13-21, 2026

GCM

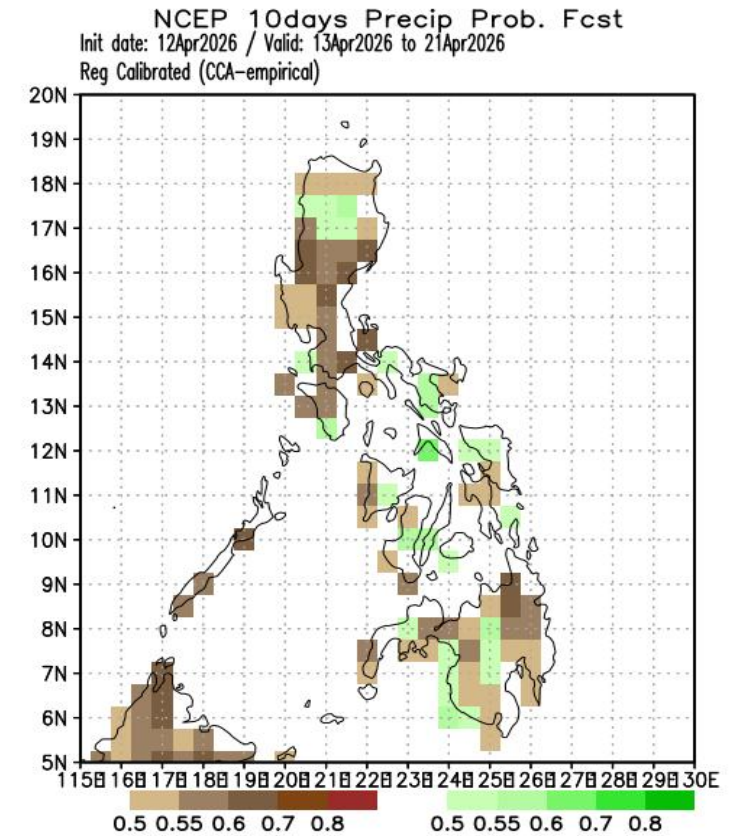

Probability of receiving above normal rainfall in most parts of the country except in some areas in Western Visayas & Zamboanga Peninsula, and northern and eastern Mindanao where below normal rainfall is expected.

PCA

Probability of receiving below normal rainfall in most parts of Luzon, Eastern Visayas, Antique, some areas in Negros Island, and Caraga Region while northern parts of Ilocos Region, CAR, Bicol Region, and the rest of Visayas and Mindanao will likely have above normal rainfall.

CCA

Probability of receiving below normal rainfall in most parts of Luzon & Mindanao, Samar provinces, Antique, and some areas in Negros Island while northern parts of Ilocos Region, CAR, Bicol Region, and the rest of Visayas, and some areas in central Mindanao will likely have above normal rainfall.
