| <b>CURRENT SITUATION OF RIVER WATER LEVEL</b>             |                        | As of <b>1:00 PM today</b> , the <b>Cagayan de Oro River</b> along: <ul style="list-style-type: none"> <li>• <b>PUNTOD BRIDGE</b> remains <b>BELOW 1.91m ALERT LEVEL (0.05m)</b></li> <li>• <b>PELAEZ BRIDGE</b> remains <b>BELOW 14.51m ALERT LEVEL (10.93)</b></li> <li>• <b>CABULA BRIDGE</b> remains <b>BELOW 40.73m ALERT LEVEL (38.77m)</b></li> <li>• <b>UGUIABAN BRIDGE</b> remains <b>BELOW 144.25 ALERT LEVEL (142.16m)</b></li> </ul>   |
| <b>AVERAGE BASIN RAINFALL</b>                             | <b>DATE &amp; TIME</b> | <b>1:00 PM, 19 DECEMBER 2023</b>   |
|   | <b>PAST 24-HR</b>      | <b>1.61 mm</b>   |
|   | <b>FORECAST 24-HR</b>  | <b>Cloudy skies with scattered rainshowers and thunderstorm</b>  |
| <b>AREAS OF CONCERN (WATERWAYS LIKELY TO BE AFFECTED)</b> |                        | <b>None</b>  |
| <b>AWARENESS INFORMATION / ADVISORY</b>                   |                        | <p>Tropical Depression "KABAYAN" has weakened into Low Pressure Area (LPA) yesterday and continue moving westward and emerge over the Sulu Sea. Cagayan de Oro (CDO) River Basin may still experience scattered rainshowers and thunderstorm due to LPA. However, water level in CDO River and its major tributaries are expected to remain within normal levels.</p> <p>Residents living near mountain slopes and adjacent to and/or along small waterways and creeks and the local disaster risk reduction and management councils (DRRMC's) concerned are still advised to maintain vigilance and take precautionary measures to mitigate the impacts of possible flashfloods, landslides and flooding due to ponding of rainwater in areas with poor drainage systems especially during the occurrence of thunderstorms. <b>All are advised to continue monitoring for updates particularly the Thunderstorm Advisories and/or Rainfall Advisories issued by the Mindanao PAGASA Regional Services Division (MPRSD).</b></p> <p>With this development and unless significant changes in the weather condition of the CDO River Basin occurs, <b>this is the final basin flood advisory for this event.</b></p> |
