

Typhoon Odette {RAI} 24 Hour Forecast

Storm Surge Warning #09 (FINAL)

Philippine Atmospheric Geophysical
and Astronomical Services
Administration

Typhoon Odette Issued: 7:00 PM, Friday December 17, 2021 **Storm Surge Warning #09 (FINAL)**

Storm surge heights have reached to insignificant level due to Typhoon Odette's areas of maximum winds are now offshore or in the West Philippines Sea. However, wind driven waves may still affect low-lying coastal communities. Latest model results show no more serious threat for storm surge.

Recommended Action
The public is still advised to continue monitor for the weather and storm surge updates from PAGASA particularly those provinces with Tropical Cyclone Wind Signals (TCWS).
