TROPICAL CYCLONE BULLETIN NR. 12 Typhoon NIKA (TORAJI)

Issued at 8:00 AM, 11 November 2024 Valid for broadcast until the next bulletin at 11:00 AM today.

"NIKA" FURTHER INTENSIFIES AS IT APPROACHES THE BOUNDARY OF ISABELA AND AURORA.

Location of Center (7:00 AM)

The center of the eye of Typhoon NIKA was estimated based on all available data including Baler and Daet Weather Radars over the coastal waters of Dilasag, Aurora (16.4°N, 122.5°E)

Intensity

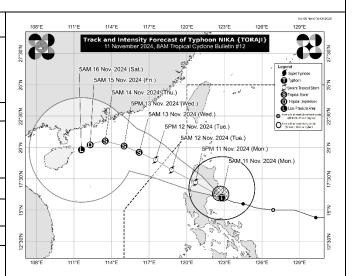

Maximum sustained winds of 130 km/h near the center, gustiness of up to 180 km/h, and central pressure of 965 hPa

Present Movement

West northwestward at 15 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to 340 km from the center

TRACK AND INTENSITY FORECAST

	Center Position				sity	Movement
Date and Time	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)

TROPICAL CYCLONE BULLETIN NR. 12 Typhoon NIKA (TORAJI)

Issued at 8:00 AM, 11 November 2024 Valid for broadcast until the next bulletin at 11:00 AM today.

1
Wind threat:
Strong
winds

Babuyan Islands, the rest of mainland Cagayan, the rest of Pangasinan, the rest of Aurora, the rest of Nueva Ecija, Bulacan, Pampanga, Tarlac, the northern and central portions of Zambales (Santa Cruz, Candelaria, Masinloc, Palauig, Iba, Botolan, Cabangan, San Marcelino, San Felipe, San Narciso), Metro Manila, Rizal, the eastern portion of Laguna (Santa Maria, Mabitac, Pakil, Pangil, Famy, Siniloan, Paete, Kalayaan, Cavinti, Lumban, Luisiana, Santa Cruz, Magdalena, Pagsanjan, Pila), the northern and eastern portions of Quezon (Infanta, Quezon, Alabat, Sampaloc, Mauban, Perez, Real, General Nakar, Calauag) including Pollilo Islands, and the northwestern portion of Camarines Norte (Capalonga, Santa Elena, Vinzons, Labo, Paracale, San Vicente, Talisay, Daet, Jose Panganiban)

Warning lead time: 36 hours

Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7)

Potential impacts of winds: Minimal to minor threat to life and property

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 12 issued at 8:00 AM today for the heavy rainfall outlook due to Tropical Cyclone "NIKA".

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- Significant to severe impacts from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- Moderate to significant impacts from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- Minor to moderate impacts from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, the northeasterly wind flow will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- Today (11 November): Batanes, Bataan, Cavite, Batangas, Lubang Island, Marinduque, Romblon, Camarines Sur, and
- Tomorrow (12 November): Ilocos Sur, La Union, Pangasinan, Batanes, and Cagayan including Babuyan Islands

Coastal Inundation

There is a moderate to high risk of storm surge that may occur in the next 48 hours in the low-lying or exposed coastal localities of Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Cagayan including Babuyan Islands, Isabela, Zambales, Aurora, Quezon including Polillo Islands, Camarines Norte, and Camarines Sur. For more information, refer to Storm Surge Warning No. 7 issued at 8:00 AM today.

Weather Division

TROPICAL CYCLONE BULLETIN NR. 12 Typhoon NIKA (TORAJI)

Issued at 8:00 AM, 11 November 2024 Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is hoisted over the eastern seaboard of Luzon and the northern and western seaboards of Northern Luzon. For more information, refer to Gale Warning No. 3 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough or high seas over the following coastal waters:

- Up to 8.0 m: The seaboards of Isabela and northern Aurora
- Up to 5.5 m: The remaining seaboard of Aurora; the eastern seaboard of mainland Cagayan
- Up to 5.0 m: The seaboards of Ilocos Norte and Ilocos Sur
- Up to 4.5 m: The northern and eastern seaboards of Polillo Islands; the seaboard of Camarines Norte, the northern seaboards of Camarines Sur and Catanduanes
- Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.

Up to rough seas over the following coastal waters:

- Up to 4.0 m: The seaboard of Babuyan Islands; the northern seaboard of mainland Cagayan
- Up to 3.5 m: The seaboard of Batanes; the remaining seaboards of Ilocos Region
- Up to 3.0 m: The eastern seaboard of mainland Quezon; the remaining seaboard of Polillo Islands; the eastern seaboard of Catanduanes
- Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.

Up to moderate seas over the following coastal waters:

- Up to 2.5 m: The seaboard of Zambales; the eastern seaboards of Albay and Sorsogon
- Up to 2.0 m: The northern and eastern seaboards of Northern Samar; the eastern seaboard of Eastern Samar; the seaboard of Kalavaan Islands.
- Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.

TRACK AND INTENSITY OUTLOOK

- NIKA is forecast to move generally west northwestward until Thursday (14 November) before turning generally southwestward on Friday (15 November) onwards. On the track forecast, NIKA may make landfall over Isabela or northern Aurora this morning. Regardless of the position of the landfall point, it must be emphasized that hazards on land and coastal waters may still be experienced in areas outside the landfall point or forecast confidence cone. The tropical cyclone will then traverse the landmass of mainland Luzon today and emerge over the sea west of Ilocos Sur this evening. Afterwards, NIKA will continue to move west northwestward over West Philippine Sea and exit the Philippine Area of Responsibility by tomorrow (12 November) morning or afternoon.
- This tropical cyclone may weaken into a severe tropical storm while traversing mainland Luzon due to land interaction. A generally weakening trend may then be expected for this tropical cyclone until it becomes a remnant low over the sea near southern China.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 11:00 AM today.
