OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 29 issued at 8:00 AM today for the heavy rainfall outlook due to "OFEL".

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Extreme impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 5.
- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Coastal Inundation

There is a **moderate to high risk of life-threatening storm surge** with peak heights reaching **1.0 to 3.0 m** in the next 48 hours over the low-lying or exposed coastal localities of Batanes, Ilocos Norte, Ilocos Sur, Cagayan including Babuyan Islands, Isabela, and northern Aurora. **Refer to Storm Surge Warning No. 8 issued at 8:00 AM today for the details.**

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is hoisted over the northern and eastern seaboard of Northern Luzon and the eastern seaboard of Central Luzon. Refer to Gale Warning No. 3 issued at 5:00 AM today for more details.

24-Hour Sea Condition Outlook

Up to very rough or high seas over the following coastal waters:

- **Up to 12.0 m:** The seaboard of Cagayan including Babuyan Islands
- **Up to 8.0 m:** The seaboard of Isabela
- **Up to 7.0 m:** The seaboard of Batanes
- **Up to 4.5 m:** The seaboard of northern Aurora; the northern seaboard of Ilocos Norte
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 3.5 m:** The remaining seaboard of Aurora; the seaboard of northern Quezon; the northern and eastern seaboard of Polillo Islands; the western seaboard of Ilocos Norte
- **Up to 3.0 m:** The northern and eastern seaboard of Catanduanes; the seaboard of Camarines Norte; the northern seaboard of Camarines Sur
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The eastern seaboard of Quezon including the rest of Polillo Islands; the eastern seaboard of Albay and Sorsogon
- **Up to 2.0 m:** The remaining seaboard of Ilocos Region; the remaining seaboard of Catanduanes and Camarines Sur; the northern and eastern seaboard of Northern Samar; the eastern seaboard of Eastern Samar.

Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.

TROPICAL CYCLONE BULLETIN NR. 12
Super Typhoon OFEL (USAGI)

Issued at 8:00 AM, 14 November 2024

Valid for broadcast until the next bulletin at 11:00 AM today.

TRACK AND INTENSITY OUTLOOK

- OFEL is forecast to move northwestward over the Philippine Sea before making landfall along the eastern coast of Cagayan or northern Isabela this afternoon. It will then emerge over Babuyan Channel tonight while making another landfall or passing close to Babuyan Islands. OFEL will then turn north northwestward to north northeastward over the sea west of Batanes by tomorrow (November 15) before turning northeastward beginning Saturday (16 November) over the sea east of Taiwan towards Ryukyu Islands by the remaining forecast period.
- **Regardless of the position of the landfall point, it must be emphasized that hazards on land and coastal waters may still be experienced in areas outside the landfall point and the forecast confidence cone.** Furthermore, the track may still shift within the limit of the forecast confidence cone.
- **OFEL may possibly make landfall as a super typhoon.** A weakening trend may ensue once OFEL approaches Taiwan until it weakens into a remnant Low over Ryukyu Islands by Monday or Tuesday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
