TROPICAL CYCLONE BULLETIN NR. 14
Typhoon MARCE (YINXING)

Issued at 8:00 PM, 06 November 2024

Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

- MARCE is forecast to move generally northwestward slowly tonight over the waters east of Cagayan before gradually accelerating westward tomorrow (7 November) through Saturday (9 November) over the Babuyan Channel and the northern portion of the West Philippine Sea. On the forecast track, **MARCE will make landfall and traverse Babuyan Islands and/or the northern portions of mainland Cagayan, Ilocos Norte, and Apayao (or pass very close to these areas) from tomorrow afternoon to Friday (8 November) early morning.** MARCE may exit the Philippine Area of Responsibility (PAR) region on Friday evening. The surge of the northeasterly wind flow will result a more southwestward movement during the weekend.
- MARCE is approaching its peak intensity. Slight weakening is expected due to possible interaction with the terrain of mainland Luzon during the landfall or close approach of MARCE, although it will remain as a typhoon throughout its passage within the PAR region. The surge of the northeasterly wind flow will trigger a continuous period of weakening during the weekend.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
