- Minor to moderate impacts from gale-force winds are possible within any of the localities where Wind Signal No. 2 is
- Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

The enhanced Southwest Monsoon will bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- Today: Luzon (areas not under Wind Signals), Visayas, and Dinagat Islands
- Tomorrow (26 July) and Sunday (27 July): Batanes, Babuyan Islands, Ilocos Region, Cordillera Administrative Region, Nueva Vizcaya, Quirino, Aurora, Zambales, Bataan, Rizal, Quezon, Cavite, Batangas, Occidental Mindoro, Oriental Mindoro, Palawan, Romblon, Bicol Region, Western Visayas, Northern Samar, and Negros Occidental.

TRACK AND INTENSITY OUTLOOK

- EMONG will continue to weaken throughout the forecast period due to increasing unfavorable environment. It will likely degenerate into a remnant low tomorrow evening while entering the East China Sea. However, a slightly faster weakening trend is not ruled out.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials.
