TROPICAL CYCLONE BULLETIN NR. 23
Super Typhoon JULIAN (KRATHON)

Issued at 11:00 AM, 01 October 2024

Valid for broadcast until the next bulletin at 5:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is hoisted over the northern and western seaboard of Northern Luzon. For more information, refer to Gale Warning No. 9 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

High seas over the following coastal waters:

- **Up to 7.0 m** over the seaboard of Batanes

Sea travel is risky all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.

Very rough seas over the following coastal waters:

- **Up to 6.0 m** over the seaboard Babuyan Islands and Ilocos Norte
- **Up to 4.5 m** over the seaboard of northern Ilocos Sur

Sea travel is risky for most types or tonnage of vessels, including all small seacrafts and motorbancas. Mariners are advised to remain in port or seek safe shelter or harbor.

Moderate or rough seas over the following coastal waters:

- **Up to 3.5 m** over the seaboard of mainland Cagayan and the remaining seaboard of Ilocos Sur
- **Up to 3.0 m** over the remaining seaboard of Ilocos Region and the seaboard of Isabela
- **Up to 2.5 m** over the seaboard of northern Aurora and northern Zambales

Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels

TRACK AND INTENSITY OUTLOOK

- JULIAN is forecast to recurve towards the sea southwest of Taiwan today through tomorrow (2 October) morning. On the track forecast, the super typhoon will make landfall along the southwestern coast of Taiwan tomorrow morning or afternoon. It will then cross the rugged terrain of Taiwan before emerging over the sea east of Taiwan on Thursday (3 October) morning. Afterwards, JULIAN will move northeastward towards the East China Sea, and exit the Philippine Area of Responsibility on Thursday evening or Friday (4 October) early morning, then turn northwestward on Friday evening to Saturday (6 October) early morning once over the East China Sea.
- JULIAN still has a window for brief intensification in the next 18 hours. Afterwards, increasing interaction with the mountainous terrain of Taiwan will slightly weaken JULIAN prior to making landfall. Its passage over Taiwan will result in JULIAN being downgraded into a severe tropical storm on Thursday.
- **Due to weak steering, sudden change in the forecast track is likely.**

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
