TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal hoisted at this time.

TROPICAL CYCLONE BULLETIN NR. 29

Typhoon AGHON (EWINIAR)

Issued at 5:00 AM, 28 May 2024

Valid for broadcast until the next bulletin at 11:00 AM today.

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

- Typhoon AGHON is unlikely to directly bring significant amount of rainfall within the next three days.
- The Southwesterly Windflow will bring moderate to heavy rains over Western Visayas and the western portion of Central and Southern Luzon in the next three days. For more information, refer to Weather Advisory No. 3 for Southwesterly Windflow issued at 11:00 PM yesterday and the 24-Hour Public Weather Forecast at 4:00 AM today.

Severe Winds

With the lifting of all hoisted wind signals, possible impacts from severe winds of AGHON within the forecast period are becoming unlikely.

HAZARDS AFFECTING COASTAL WATERS

All Gale Warning for coastal waters have been lifted. However, AGHON will bring moderate to rough seas (1.0 to 4.0 m) over the coastal waters of Cagayan (eastern coast), Isabela, northern Aurora and the northern coastal waters of Polillo Islands, Camarines Norte, Camarines Sur, and Catanduanes. **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigating in these conditions, especially if inexperienced or operating ill-equipped vessels.**

TRACK AND INTENSITY OUTLOOK

- On the track forecast, Typhoon AGHON will move generally northeastward over the Philippine Sea for the entirety of the forecast period and exit the Philippine Area of Responsibility (PAR) on Wednesday afternoon or evening.
- AGHON will likely maintain its strength until tomorrow before entering a period of weakening on Wednesday as it begins to interact with the mid-latitude environment and undergo post-tropical transition. However, an earlier weakening trend is not ruled out.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
