

## TROPICAL CYCLONE BULLETIN NR. 2F

### Low Pressure Area (formerly "AURING")

Issued at 5:00 AM, 13 June 2025

#### "AURING" WEAKENS INTO A REMNANT LOW.

##### Location of Center (4:00 AM)

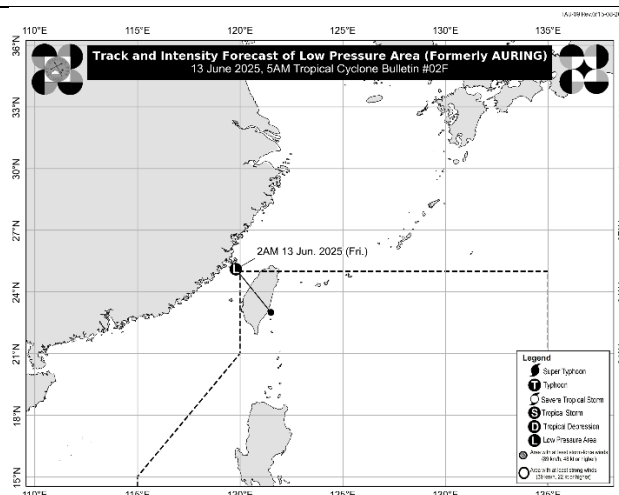

The Low Pressure Area (formerly "AURING") was estimated based on all available data at **580 km North Northwest of Itbayat, Batanes (OUTSIDE PAR) (25.7°N, 119.9°E)**.

##### Intensity

Central pressure of **1004 hPa**

##### Present Movement

**Northwestward at 40 km/h**

#### TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT

No Wind Signal currently hoisted.

#### OTHER HAZARDS AFFECTING LAND AREAS

##### Heavy Rainfall Outlook

The Low Pressure Area is less likely to bring significant heavy rainfall. For more information, refer to **Weather Advisory No. 29 Final** issued at 5:00 AM today for the heavy rainfall outlook.

##### Severe Winds

Today, the Southwest Monsoon will likely bring strong to near-gale gusts over Batanes and Babuyan Islands.

## TROPICAL CYCLONE BULLETIN NR. 2F

### Low Pressure Area (formerly "AURING")

Issued at 5:00 AM, 13 June 2025

#### HAZARDS AFFECTING COASTAL WATERS

##### 24-Hour Sea Condition Outlook

Up to moderate to rough seas over the following coastal waters:

- **2.5 to 3.0 m:** The seaboard of Ilocos Region, Zambales, Batanes, and Babuyan Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The western seaboard of Bataan.
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

#### TRACK AND INTENSITY OUTLOOK

Due to the frictional effects associated with the landfall over Taiwan, AURING weakened into a Low Pressure Area at 2:00 AM today. The remnant low will likely move generally northward or northeastward and will merge to the frontal system.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development and re-entry occur, this is the final bulletin for this weather disturbance.

**DOST-PAGASA**
