TROPICAL CYCLONE BULLETIN NR. 3 Tropical Depression JULIAN

Issued at 5:00 PM, 27 September 2024

Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

- JULIAN is forecast to follow a looping path over the waters east of Batanes and Cagayan in the next five days. Initially, the tropical cyclone will head south southwestward or southwestward today through early Sunday (29 September) while decelerating, then move slowly northwestward or north northwestward beginning mid-Sunday, then turn northward or north northeastward on Tuesday (01 October) onwards.
- There is an increasing chance that the track forecast will shift westward in the succeeding bulletins, bringing the projected path of JULIAN closer to Extreme Northern Luzon.
- The tropical depression will continuously intensify throughout the forecast period and may reach tropical storm category tonight or tomorrow morning. Furthermore, it may become a typhoon on Sunday. **Rapid intensification is increasingly likely.**

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
