

**TROPICAL CYCLONE BULLETIN NR. 5**  
**Typhoon PEPITO (MAN-YI)**

Issued at 11:00 PM, 15 November 2024

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

**TYPHOON “PEPITO” FURTHER INTENSIFIES AS IT CONTINUES TO MOVE WEST NORTHWESTWARD OVER THE PHILIPPINE SEA EAST OF EASTERN VISAYAS.**

**Location of Center (10:00 PM)**

The center of the eye of Typhoon PEPITO was estimated based on all available data at **305 km East of Guiuan, Eastern Samar (11.5°N, 128.5°E).**

**Intensity**

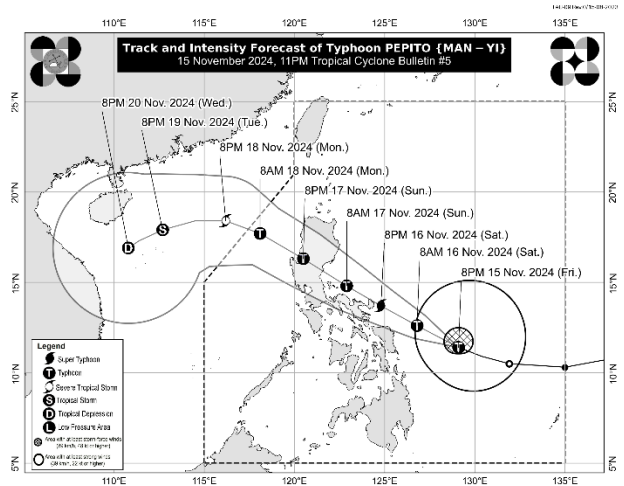

Maximum sustained winds of **155 km/h** near the center, gustiness of up to **190 km/h**, and central pressure of **955 hPa**

**Present Movement**

**West northwestward at 25 km/h**

**Extent of Tropical Cyclone Winds**

**Strong to typhoon-force winds** extend outwards up to **440 km** from the center

## TROPICAL CYCLONE BULLETIN NR. 5 Typhoon PEPITO (MAN-YI)

Issued at 11:00 PM, 15 November 2024

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

### OTHER HAZARDS AFFECTING LAND AREAS

#### Heavy Rainfall Outlook

Refer to Weather Advisory No. 39 issued at 11:00 PM today for three-day heavy rainfall outlook associated with "PEPITO"

#### Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from strong winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal which may be hoisted during the occurrence of PEPITO is **Wind Signal No. 5**.

#### Coastal Inundation

There is a **moderate to high risk of life-threatening storm surge** with peak heights reaching 3.0 m above mean sea level in the next 48 hours over the low-lying or exposed coastal localities of Isabela, Aurora, Quezon, Batangas, Marinduque, Bicol Region, Northern Samar, Eastern Samar, Samar, Biliran, and Leyte. **Refer to Storm Surge Warning No. 4 issued at 8:00 PM today for the details.**

### HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is hoisted over the eastern seaboard of Southern Luzon and eastern seaboard of Visayas. Refer to Gale Warning No. 9A issued at 11:00 PM today for the details.

#### 24-Hour Sea Condition Outlook

Up to very rough or high seas over the following coastal waters:

- **Up to 12.0 m:** The seaboard of Catanduanes.
- **Up to 8.0 m:** The eastern seaboard of Albay, Sorsogon, and Eastern Samar; the northern and eastern seaboards of Northern Samar.
- **Up to 5.5 m:** the eastern seaboard of Camarines Sur.
- **Up to 4.5 m:** The northern seaboard of Camarines Sur.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The eastern seaboard of Dinagat Islands
- **Up to 3.5 m:** The seaboard of Surigao del Sur and Siargao Islands
- **Up to 3.0 m:** The seaboards of Batanes, Isabela, Aurora, and northern mainland Quezon; the northern and eastern seaboards of Polillo Islands; the eastern seaboard of mainland Cagayan and Davao Oriental; the remaining seaboard of Northern Samar.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Eastern Samar and Cagayan including Babuyan Islands, the northern seaboard of Dinagat Islands; the eastern seaboard of Leyte; the southern seaboard of Samar.
- **Up to 2.0 m:** The remaining seaboards of Camarines Sur, Albay, Sorsogon, Dinagat Islands, and Surigao del Norte including the rest of Siargao Islands; the northern seaboard of Ilocos Norte, Masbate including Ticao and Buriyas Islands, and Leyte; the seaboards of Samar and Biliran; the eastern seaboard of Southern Leyte and Quezon including the rest of Polillo Islands.
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

## TROPICAL CYCLONE BULLETIN NR. 5 Typhoon PEPITO (MAN-YI)

Issued at 11:00 PM, 15 November 2024

Valid for broadcast until the next bulletin at 2:00 AM tomorrow.

### TRACK AND INTENSITY OUTLOOK

- PEPITO is forecast to move generally west northwestward within the next three days before turning generally westward to west southwestward from Monday (18 November) evening to Wednesday (20 November) evening. On the track forecast, PEPITO is more likely to make landfall in the vicinity of Catanduanes tomorrow (16 November) evening or on Sunday (17 November) early morning. However, considering the limits of the forecast confidence cone, a landfall scenario over the eastern coast of Camarines Sur, Albay, or Sorsogon during the same time frame, over the eastern coast of Northern Samar tomorrow afternoon or evening, or along the eastern coast of Quezon or Aurora on Sunday afternoon or evening remains not ruled out. PEPITO is expected to exit the PAR region on Monday.
- Regardless of the landfall point, PEPITO will more likely move generally west northwestward over the weekend and pass over or near the landmass of Bicol Region, Quezon, Central Luzon provinces, and Pangasinan before emerging over the West Philippine Sea on Sunday evening or Monday morning.
- **It must be emphasized that heavy rainfall, severe winds, and storm surge may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- PEPITO will continue to rapidly intensify today through tomorrow and may reach super typhoon category prior to its landfall tomorrow evening or on Sunday early morning. Although a slight weakening may occur after its initial passage over land, much of the weakening will occur on Sunday as PEPITO passes over landmass of Central Luzon. Nevertheless, it will traverse the country as a typhoon and will likely be downgraded into a severe tropical storm once it is over the West Philippine Sea on Monday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 2:00 AM tomorrow.
