

**TROPICAL CYCLONE BULLETIN NR. 9**  
**Tropical Depression GENER**

Issued at 8:00 AM, 17 September 2024

Valid for broadcast until the next bulletin at 11:00 AM today.

**“GENER” SLIGHTLY WEAKENS AS IT INTERACTS WITH THE CORDILLERAS**

<b>Location of Center (7:00 AM)</b>	
The center of Tropical Depression GENER was estimated based on all available data in the vicinity of <b>Ambaguio, Nueva Vizcaya (16.5°N, 121.0°E)</b>	
<b>Intensity</b>	
Maximum sustained winds of <b>45 km/h</b> near the center, gustiness of up to <b>55 km/h</b> , and central pressure of <b>998 hPa</b>	
<b>Present Movement</b>	
<b>Southwestward at 15 km/h</b>	
<b>Extent of Tropical Cyclone Winds</b>	
<b>Strong winds</b> extend outwards up to <b>330 km</b> from the center

## TROPICAL CYCLONE BULLETIN NR. 9

### Tropical Depression GENER

Issued at 8:00 AM, 17 September 2024

Valid for broadcast until the next bulletin at 11:00 AM today.

#### HAZARDS AFFECTING COASTAL WATERS

##### 24-Hour Sea Condition Outlook

**Gale Warning is in effect** over several coastal waters in the northern seaboard of Northern Luzon, the western and southern seaboards of Southern Luzon, the seaboards of Visayas, and the western, northern, and eastern seaboards of Mindanao. For more information, refer to Gale Warning No. 6 issued at 5:00 AM today. **Sea travel in these waters is risky for small seacrafts, including all types of motorbancas.**

##### **Up to rough seas over the following coastal waters:**

- **1.5 to 3.0 m:** The eastern seaboard of Bicol Region, the seaboard of Visayas outside Gale Warning areas, and the eastern seaboards of Caraga Region and Davao Region.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

##### **Up to moderate seas over the following coastal waters:**

- **Up to 2.5 m:** The remaining seaboards of the country outside Gale Warning areas.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions.**

#### TRACK AND INTENSITY OUTLOOK

- GENER is forecast to emerge over the coastal waters of Ilocos Sur or La Union today. The tropical cyclone will then move generally westward over the West Philippine Sea until Thursday (19 September) before turning west northwestward as it heads towards southern China.
- GENER may exit the Philippine Area of Responsibility (PAR) between tonight and tomorrow (18 September) morning.
- In the next 12 hours, GENER may possibly weaken into a Low Pressure Area as it continues to interact with the rugged terrain of Northern Luzon. However, as it emerges over the coastal waters of Ilocos Sur or La Union, it may reach tropical storm category tomorrow early morning, and further intensification over the West Philippine Sea is not ruled out.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
