PRESS STATEMENT

22 December 2021

This is an update on the low-pressure area (LPA) being monitored by PAGASA that is expected to enter the Philippine Area of Responsibility (PAR).

Based on current data available, the low-pressure area (LPA) over the Pacific is expected to enter the PAR on the 26th or 27th of December. It will be closest to the landmass of Mindanao on the evening of 29th or morning of 30th of December. This LPA has 60-70% chance to develop into a tropical depression. In this regard, the public is advised to continue monitoring for possible changes on the forecast scenario, undertake precautionary measures, and remain vigilant against unofficial information coming from unverified sources.

Official information is being released by PAGASA through the following official accounts:
