

TROPICAL CYCLONE ADVISORY NR. 1

Tropical Depression

Issued at 11:00 AM, 13 November 2023

Valid for broadcast until the next advisory at 11:00 PM today

THE LOW PRESSURE AREA OUTSIDE THE PHILIPPINE AREA OF RESPONSIBILITY HAS DEVELOPED INTO A TROPICAL DEPRESSION

Location of Center (10:00 AM)	
The center of the Tropical Depression was estimated based on all available data at 1,540 km East of Southeastern Mindanao (7.2°N, 139.6°E) (OUTSIDE PAR)	
Intensity	
Maximum sustained winds of 45 km/h near the center, gustiness of up to 55 km/h , and central pressure of 1004 hPa	
Present Movement	
Eastward at 20 km/h	
Extent of Tropical Cyclone Winds	
Strong winds extend outwards up to 200 km from the center

TROPICAL CYCLONE ADVISORY NR. 1

Tropical Depression

Issued at 11:00 AM, 13 November 2023

Valid for broadcast until the next advisory at 11:00 PM today

GENERAL OUTLOOK FOR THE FORECAST PERIOD

- The Tropical Depression is forecast to track south southwestward in the next 12 hours, then turn west southwestward before turning west northwestward while gradually accelerating as it approaches the eastern boundary of the Philippine Area of Responsibility (PAR). It will then turn further west northwestward or westward on Thursday (16 November) on a steady pace towards the waters of Eastern Visayas.
- On the track forecast, the Tropical Depression may enter the PAR region on late Wednesday (15 November) or Thursday (16 November) and the domestic name "KABAYAN" will be assigned once inside the PAR region.
- This tropical cyclone may intensify over the TCA region and reach Typhoon category with peak intensity of **120 km/h** on Saturday. The possibility of further intensification prior to its close approach to Eastern Visayas is not ruled out.
- Current track and intensity forecast shows that there is a high likelihood that Tropical Cyclone Wind Signals will be hoisted over Eastern portions of Visayas and Mindanao. The passage of this tropical cyclone over Eastern Visayas may bring heavy rainfall over several provinces in Visayas, Mindanao, and Bicol Region beginning Friday (17 November).
- Furthermore, the tropical cyclone may also bring rough to very rough seas over the eastern seaboard of Southern Luzon, Visayas, and Mindanao beginning Thursday (16 November). Such condition may be risky for those using small seacrafts. Mariners are advised to continue monitoring for updates.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless an intermediate advisory or initial tropical cyclone bulletin is released, the next tropical cyclone advisory will be issued at 11:00 PM today.
